**Q1** Which of the following best describes how well you understand the expectations for businesses and customers during Stage 2 of the governor's shelter-in-place executive order?

(3367 responses)

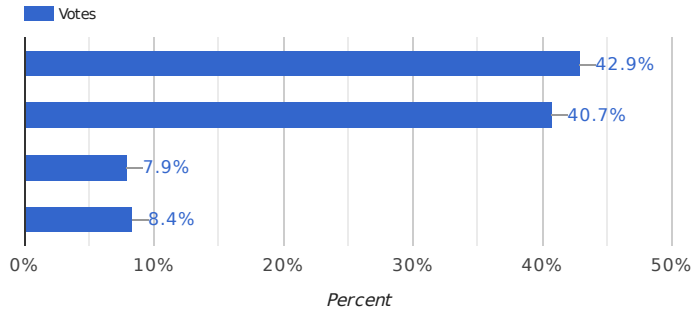

Options	Votes (3367)
I'm not really sure what's expected of me or businesses	23.5% (790)
I know what's expected of me, but not businesses	19.8% (665)
I know what's expected of businesses, but not me	2.8% (93)
I know what's expected of me and of businesses	47.9% (1612)
Not Sure	6.1% (207)

**Q2** Which of the following best describes how well businesses are informing you on-site (signage/posters) about state guideline?

(3337 responses)

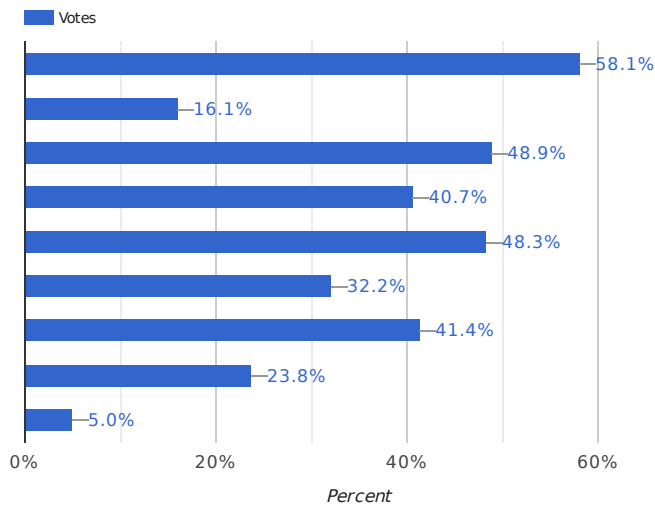

Options	Votes (3337)
Most businesses are keeping me well informed	42.9% (1432)
I've seen a mix of good and not as good	40.7% (1358)
I haven't really noticed any signage/posters posted in businesses	7.9% (265)
Not Sure	8.4% (281)

**Q3** Which of the following are most important to you when visiting a business? (You can choose up to FOUR, if any)

(3216 responses)

Options	Votes (3216)
Business employees wearing face masks	58.1% (1868)
Visible signage/posters illustrating COVID-19 safety guidelines	16.1% (519)
Other customers wearing face masks	48.9% (1574)
Wearing a face mask myself	40.7% (1310)
Cleaning (disinfecting high-touch surfaces, items)	48.3% (1554)
Limiting the number of customers in an establishment	32.2% (1036)
Physical distancing measures (6 feet of spacing)	41.4% (1330)
I don't really need these to feel comfortable	23.8% (767)
Other:	5.0% (160)

place back everyone social healthuse  
 important county distance  
 time normal take open  
 like business people thing  
 available without go mask require keep  
 long limited face feel wear let think  
 way wash employee customer clean want  
 risk virus need enough precaution followed number hand

keep it clean and I am good.

that they are OPEN

Open up businesses, churches, massage.....so over this crap!!

Barriers between customers and cashiers

Lets get back to normal. Why is it ok for protestors not to social distance, but everyone else is?

following State and federal guidelines re COVID-19

get on with life. Overdone

the typical precautions used for other communicable diseases should be enough for all

Business employees wearing a face mask CORRECTLY!!

REQUIRING face masks

Enough, you can protest without restrictions, but cannot go to church or dinner without them

Stop acting like this is anything worse than a seasonal flu

I don't need any one to wear a mask or distance. Just wash your hands

If employee is behind plexiglass, they shouldn't have to wear a mask.

Limiting it to 4 choices doesn't meet my goals for visiting a business.

All of the Above

Really all of them

I think this is a load of BS. A political game against the people.

I always wear a face mask, it's disturbing to see others who don't care about those around them.

Everyone should be wearing face masks and social distant and limited number of customers at any one

I will not patronize any Placer County business unless face masks are required.

I want to select all of these - all of these are important to me.

Less Fear. Normalcy.

STOP THIS MADNESS!

Personal gatherings, I do not understand how I can go to eat to the mall but not gather with others

I'm not worried! Let's go back to our lives!

I avoid "health theater" and those who participate in it. Effectiveness matters, not visibility.

they have taken this way too far and way too long!!!!!!!!!!!!!! the virus dies at 87 degrees!!!!!!!!!!

All should be wearing mask if unable to maintain 6 ft.

I refuse to go to business that require a face mask. Face masks are absolutely unnecessary.

Having cleaning supplies available for self cleaning carts.

I'd include signage with clear instructions, cleaning and safety measures in place

Common Sense!

OPEN PLACER COUNTY! We are smart enough to take our own precautions & assess our risks.

Limiting to 4 is ridiculous. Masks, distancing, limiting customers, disinfecting all important

I'm ready for common sense precautions taken by people and businesses as they see fit. No laws!!

The statistics have proven to be completely wrong. Businesses should reopen immediately

Poor question. If you are following State & CDC you would have selected more choices

If you're not comfortable with the risks then stay home..but others are fine accepting risk

Cleaning (disinfecting high-touch surfaces, items)

no hand washing, no hand sanitizer use... Over use if gloves.

I would prefer non-essential businesses were still closed.

Ridiculous that I can only choose 4 when they all are important

Let the business decide on the protection. Release the liability from the business

Only those at risk should take precautions if they CHOOSE.

Regarding masks: whatever the medical profession says is best

Please open nail shops!

This did not let me change my responses.

I'm comfortable visiting a business

Evidence the business is taking guidance seriously, not just signage but real visible changes.

Restrictions are too severe. World Health Org doesn't require face masks to be worn all the time.

All are important and none followed near enough

only going to stores/restaurants that are not mandating masks

I do not like wearing mask and do not like businesses employees wearing them.

I won't be dining in for a long time. If the restaurant has curb side I'll continue to do that.

all the added protection suggestion are good

All wearing a face mask

Letting adults make their own decisions

face masks are important depending on business.

LETS GO TO THE GYM AND CHURCH & SHARE THE TRUTH ABOUT MASKS AND BREATHING YOUR OWN CO2!

Does anyone actually know what newsome wants?

Not being required to cover my face for false security

The county and the Cities are totally inept at finding the ways to assist small business to grow .

I actively patronize businesses that are NOT enabling a "new normal"

Everybody wearing a mask and following the guidelines in the business

I honestly feel that everyone understands and is good to go!

All employees and customers should be required to wear face masks.

All of the above.

All people observing social distancing

Providing hand sanitizer at entrance/exit

Its all been a great con game

Open up and cut the restriction crap.

My observation of businesses is limited because I'm not yet going to businesses.

Inconsistent implementation. Government overreach.

I think we are way overdoing the cautions - had dinner out 3 times, every restaurant was great.

This whole thing is dumb. Businesses should be open without added requirements.

Open please

Masks on everyone +6 feet of space. ALL the things.

all shops and reastaurants should require patrons to have masks on. people is Placer County are not

Numbers are increasing again, and politicians & businesses seem to be ignoring that fact. Close.

Some of all, mask on business is Comforting but not required. 6 feet apart signage is a plus

To be able to wash hands with warm water and soap with paper towels available. This is rare.

It's all ridiculous. None of it is necessary.

OPEN IT ALL safe to protest=safe to live normally

Please encourage everyone to wear face masks when out in public! Our numbers are rising

All businesses should require face masks. It is abhorrent how few do.

Customers actually paying attention to arrows that are to direct the flow of people.

Personal Responsibility #1

All of the above

I don't like that business' do not care anymore about employees or customers wearing a facemask

I feel this has been blown out and we need things back to normal

i heard through the grapevine that el toro bravo employees were not wearing face masks.

all these things dont bother me, but I think they are what I look for so I know whats expected of m

I truly don't care. Statistically speaking, I take a greater risk DRIVING to the business.

sanitizer available to the public

Out of towners showing just a little bit of respect and class.

No fans or air conditioners running

businesses that respect a personal choice without mandate

There should be no restrictions

Businesses dedicated to keeping sick employees at home.

Being able to access the business outside as much as possible.

I always wear a mask, but really appreciate when all the other customers also do.

None of this should be required. Just open.

Physical distancing and limiting customers. I want all of it!

All options (except the next to last) are important to health. It's all together, not 1 or 2 alone.

Keep consistent hours hard to know who is open or not

They are all equally important. I do not intend to enter many businesses in the near future.

It depends on the size of the store. But keeping the doors open seems like it would keep air clean

I find all this unsettling, unnecessary!

I will not go into a store where employees and/or customers are not required to wear a face mask.

People are idiots for falling for this crap

i'm staying home. i see the county's website and cases are increasing dramatically. 65 yrs old

I don't go into businesses without masks.

The sooner we are all infected with covid-19, the better. Let's get on with it.

Everyone wearing masks, Cleaning, limiting numb of customers in, and Physical distancing 6 ft

I'mt sure it's time to reopen even with these measures in place. This thing ain't over.

availability of wipes our sanitzier at business

face masks are for the protection of others--so if around shoppers should wear

That they are open - I just avoid people who are not being respectful of others.

Everyone wearing face masks, limiting number of customers

Employees wearing gloves

I don't feel safe going to businesses. There are high reported cases. People over profit!

I prefer to support businesses that don't have a face mask requirement.

Get back to normal make the old people stay home

IF EVERYONE WEARS A MASK THIS THING WOULD BE GONE IN A MONTH!

businesses enforcing customers to wear facemasks

The disease may be real but the supposed threat is politics & leading us into socialism.

6 feet physical distancing

I am high risk, so will only visit a place where masks are required for all

Masks should be mandatory

All of the above within readon

just open already before they go out of business holy crap

wish checkout would wipe down conveyors

all of the above are important

Quality Customer Service

Physical distancing and signage are also important to me.

I would like it if tourists were more considerate of cleanliness and common areas.

Being real about the virus based on facts not fear

all of theabove except tha last one

Prefer customers wear masks but will shop if given space to avoid those not wearing masks

Why don't the rules to protesters

More than likely, this virus is 90% political and will stop right after the election.

I'm comfortable walking into any business regardless of any measures in place. None are needed.

As long as they are cleaning the masks are more frightening to my son and they are not effective an

All of these are concerns.

Improved air ventilation

I think the whole thing is ridiculous and abuse of our constitutional rights and it's time to be ov

Masks for both employees and customers or they lose me as a long time customer. Respect 4 others.

knowing that employees (and in some cases, customers) are screened for health

I want to Be able to pick six: wearing a ask myself and Limiting the number of customers

Why all the precaution? We don't do this for the flu!!

I wanted to check all of them except the last one before "other"

Offering hand wipes

Freedom is more important to me than any safety measures. I feel this survey is biased.

Everyone wearing masks!!!!!!

Let everyone open with the guidelines. Some places are over following and others under. We can deci

Frankly, I think most of the listed points are important to the safety of the public visiting the b

Lighten up. We all need to just live and wash our own hands

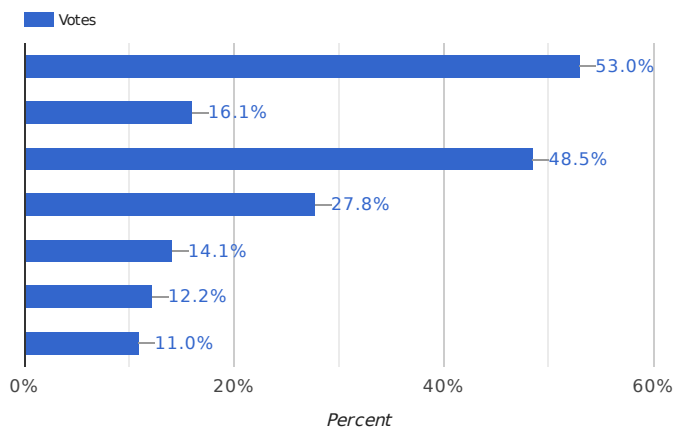

Actually all

All wearing a mask, less folks inside so spacing is possible all make me feel better about shopping

#### Q4 Which of the following are TRUE for you, if any? (Choose all that apply)

(3184 responses)

Options	Votes (3184)
I feel like most businesses I visit are doing a good job of encouraging masks and social distancing	53.0% (1686)
I feel like most of the businesses I visit are NOT doing a good job of encouraging masks and social distancing	16.1% (513)
I would not visit a business that made me feel unsafe	48.5% (1544)
I have visited a business that wasn't doing a good job of using masks and social distancing	27.8% (885)
I have visited a business that made me feel unsafe and I left without doing business there	14.1% (449)
I haven't really visited any businesses since they reopened	12.2% (387)
Other:	11.0% (350)

follow need store stay back distancing employees covid  
 thing  
 reopen mask wear good shop county  
 place  
 concern make like think let care guidelines time  
 want safe busi feel people regardless  
 comfort necessary  
 use social ruleface visit open take  
 worry home go require customer  
 job enforce grocery since  
 prefersafety

Coscto -- bunch of mask and space nazis! Employees yell at you...will not be going back there.

Open all businesses, the shutdown was completely uncalled for.

Dont care

Open up!!!!!!!!!!!!!!!!!!!!!!

I do not feel unsafe in most businesses, regardless of their Covid approach

I'm beginning to think it is bs. Not placer, but at hard rock you don't need a mask if you smoke

I feel it is a necessary step for employees to wear masks. I myself wear one out of courtesy.

I realize the need to reopen businesses, but I still feel it is too soon. Worried about an uptick

Because many businesses are not good at implementing guidelines, we avoid as many of them as possib

putting demands on businesses to provide a 'safe' disease free environment is false safety

I have left businesses because of unreasonable lines outside in both rain and heat.

I don't care, this whole thing g is ridiculous

Fear factor can answer these questions. Life goes on

I feel comfortable going to any business

See previous reply

I feel like the county is putting unnecessary restrictions on people and businesses

Our local businesses and residents are not taking appropriate precautions

The whole Social Distancing thing is BS

Truckee Tahoe Lumber is completely blowing off the guidelines

The rules are relaxing as time passes. Originally staff and customers were more observant.

We have seldom gone out...still SIP

People do not wear masks properly. Either under their nose or around their neck

I feel business's we're late to require employees to wear masks. Particularly food industry workers

It should be on the comfort level of the person to protect themselves to a level of comfort.

Met a friend for lunch yesterday. All employees were wearing masks, but not patrons which was fine

We are over it.

I have felt comfortable at all businesses that I have visited.

People working are wearing masks but customers are not nor are they socially distancing.

Masks are not being encouraged. Limiting the number of patrons in restaurants is working.

We're happy with businesses, masks or not

Most business are doing a horrible job of using masks and social distancing

I am only visiting essential businesses and doing businesses with social distancing (pick up only).

I refuse to shop at a store that wants me to wear a mask

I get to go food, no need to go inside a business.

Esp. smaller businesses are NOT doing a good job wearing and enforcing masks - I will NOT buy there

There's no consistency from one store to the next. Anything goes and that's okay with me.

Masks need to be made mandatory. Look at San Francisco, it's mandatory.

Nobody should be required to do anything. Allow people to protect themselves and self-govern.

I am not worried about getting the virus.

I have not been back to the business where masks were not enforced doing pickup or delivery instead

I don't feel masks should be a requirement. It should be up to the costumer to take precautions

Have only visited a few businesses since they reopened.

I take it upon myself to do what I need to be safe. Mask and gloves are a false sense of security.

I don't rely on others for my safety. I take care of myself and my safety needs.

Some are, some are not, seems very arbitrary as to which businesses are under what guidelines

I feel that people and businesses should do what they want.

I would like enforcement of wearing masks

Not afraid to go into any business

Every place I visit is doing a fine job

I think wearing masks is dangerous to your health.

Only visited one business since they reopened. Employees were wearing masks and disinfecting surfac

Masks and social distancing need to be discontinued immediately! They are a sham created by the gov

I will not order to go if a restaurant is serving customers in their dining room.

customer mask use is 50/50 at best. Most employees are wearing masks.

This all stupid & a taking of my freedom & rights under the constitution a mockery by ruling class

I feel like this is way over blown

I am comfortable being allowed to make my own decision about whether or not I wear a mask.

Some good and some bad businesses. CVS, Home Depot are bad.

Wearing a face mask shouldn't be mandatory anywhere. It poses a dangerous risk to my health.

It is true that I believe quarantine tactics have gone on longer than necessary.

No concern. They should be able to conduct business as they see fit.

Masks are unnecessary, social distancing is good

I will not patron a business that makes me wear a mask.

None of these apply to me

I have only done take out and grocery shopping

I have avoided businesses that do not follow the WHO guidelines on virus safety.

I'm still trying to stay home as much as possible. Just a rare trip out of the home area.

Most use masks & encourage social distancing via floor signs, but don't require masks for patrons

Raleys and Bel Air do not enforce mask wearing on customers and they should

I don't like mask requirement or waiting outside; overboard.

I'm honestly not worried about masks or distancing.

Face masks and social distancing is ridiculous. Let businesses open back up as normal.

I haven't gone to very many places yet. I plan to do so but slowly.

Each patron needs to determine their level of comfort. This is not a one size fits all!

It's been a mix and I will continue to support those businesses which do a good job

I now limit visits to businesses that make me feel safe

I have been comfortable with all levels of engagement.

OPEN PLACER COUNTY! The closures is utterly ridiculous and purely political at this point.

I wish more business would go back to normal and stop with the masks and distancing.

Most open business are doing a good job but the customers are not.

I do not feel enough cleaning is being done at registers, doors, etc.

I'm not bothered by businesses that are more lax with the rules.

Masks and social distancing is stupid and depressing

Not really worried one way or the other.

I don't want to be forced to wear a mask.

I do not patronize businesses that require face coverings or social distancing

I have visited very few, but I felt safe.

I feel most businesses are doing a good job of keeping their businesses safe as appropriate.

social distancing and face mask requirements are not necessary and have morphed into political hell

Employees wear masks which is good, but other customers really should wear masks too, to protect ev

The news regularly shows parks, malls, restaurants, & protests violating social distancing/masks

Grocery store customers are the worst

All business are safe to reopen. Require a mask you lose my business

I have visited nightclubs/bars that are opened as "restaurants" but not really meeting rules

I'm living life. Not in fear.

At an infection rate of .0006 in our county please open all businesses / let our kids in school

I feel great about going to businesses and think they are doing a great job.

Just happy that businesses are open. My safety is my responsibility

i feel businesses don't need to do this. let them all open and consumers can chose to go or not

The businesses doing a great job are rare and should be commended.

I don't feel I should be required to wear a mask in a business.

I avoid businesses that require me to wear a mask

There needs to be special time frame openings for at risk - gym, hair, shop, etc. really lonely

I have no concerns of getting covid. This whole thing is ridiculous.

Unlikely to visit where I have to wear a mask. Deep cleaning has always been important

Newsom has muddied the waters so completely that this whole damn thing is a joke.

If businesses post that face masks are REQUIRED, why aren't they enforcing this? And how?

I would not do business at their store if they require customers to wear masks.

I will never put on a mask in any business except medical ones.

Fewer people are wearing masks in the grocery store. I will not go to business without that being e

Still need a haircut! ☺

I feel the response to COVID-19 is very overblown & do not shop at businesses requiring masks.

I don't visit businesses that require face masks. I'm allergic to conventional chemical cleaners

I wish the grocery stores would be firmer about customers wearing masks and other safety guidelines

I stay away from businesses that go overboard

Wearing masks and practicing social distancing is unnecessary and ridiculous

Businesses like brewery and restaurant are NOT doing a good job re. face masks.

I've only been to the supermarkets and post office - they're doing a good job.

This question encourages a negative response.

I am no longer visiting business that didn't have safeguards in place

I won't visit a business that requires face masks

I have not been out in the last 2weeks

I prefer visiting businesses that keep regulations to a minimum and let ppl decide for themselves

this is all over-kill all these requirements are unnecessary

Most are doing well distancing and workers wearing masks but not making customers wear masks.

Visited only grocery store or pharmacy

all employees & all customers should be masked

I'm still only going to the grocery store and getting occasional take out

The public is doing what feels good to them regardless of recommendations. No enforcement efforts.

disappointed that the post office workers don't wear masks

They can do what they want and I can decide whether to solicit them or not.

I always thank business owners for not requiring masks for customers

I have visited businesses that require face masks and that made me uncomfortable

Let businesses open and set their own policies.

I'm not concerned with people wearing masks or social distancing in businesses

SOME BUSINESSES HAVE OPERATED THAT WERE SUPPOSE TO REMAIN CLOSED

I have visited two businesses that were doing a good job and one other business that was not.

I remain cautious about going into any inclosed space. I will do pick up if placed in car trunk

Businesses are only encouraging masks for their employees, not customers

I have visited very few businesses since they've reopened.

I don't believe all this is necessary. Too many proofs out, the CDC has reversed position on masks

The government has taken away our freedom to decide to stay at home or be in public areas.

It is not all that important to me in Placer or Nevada county

It really depends by the business but I have observed many people refusing / belligerent about mask

I don't appreciate mask requirements

Baskin Robbins OB Foothills is a TINY space and they have way to many people in there

I visit businesses regardless and don't care

Only business I've seen require masks for customers was Goodwill on Sunrise/ Roseville. Appreciated

Most businesses needed these surveys at the start of the panic that caused the unnecessary close

I think businesses could do a better job of informing us that they are open.

I haven't visited many businesses since reopening, but some are not using masks and they should.

Covid isn't as bad as they're saying according to the cdc so I don't care!

I don't visit businesses that require a face mask.

Have visited mostly larger businesses. Don't know about small businesses.

Some businesses are doing a good job, and others aren't.

I feel safe without masks.

I understand sometimes business may be reluctant to enforce customers wearing masks.

Its all been a great con game

I don't need businesses telling me what's safe....I would like to visit their business on my own re

I feel safe without masks and physical separation

I prefer to visit businesses that aren't forcing customers to do anything special.

My visits to business is very limited at this time.

If you don't feel safe , stay home and let the grownups go about their business.

I do not go to places with mask requirements.

I've been to very few businesses. But they seem to be doing there best by wearing masks, sanitizing

Take my chances. I'm not an un-informed person...basic education which we used to have taught me

It seems that smaller businesses are treating the mask/social distancing as a joke to be ignored.

The whole concept of social distancing and face masks is unnecessary. Read the current science

Time to move on

For the most part most businesses are doing more than what is needed

Home Depot is doing a poor job since this began.

I think Hand-washing is enough. NO MASKS!

I feel like some businesses are trying but the customers are not complying with mask recommendation

I am more annoyed about all the rules than concerned. No fun anymore to go into a store.

I have visited businesses that weren't requiring masks/social distancing and I felt safe

If you need special provisions stay home, I go out and don't expect businesses to provide covid pre

As long as high-touch surfaces are disinfected, I don't see a problem.

I joined costco because they are the only ones requiring masks.

Let businesses determine their guidelines, they will adapt as customers request

Businesses in the foot hills are very relaxed. Don't enforce masks

Don't feel unsafe with or without masks. Data has shown they are not as good at stopping the spread

I will not go to a business that requires me to wear a mask.

I only go where I feel safe

I have been to several restaurants where staff is not wearing masks and I am very uncomfortable

No need for masks, counter productive

i wish stores would continue to enforce the mask rule inside and not just at the door

I will not go to a business that forces mask wearing.

I am amazed at the number of people that seem oblivious to what PREVENTION means.

I don't care about these stupid rules, I wear a mask if they ask me to

Some businesses are doing a great job, others aren't.

employees aren't enforcing rules and signage for customers

Long lines outside a business are not self distancing. Distancing does occur while in most busi.

this is a very biased poll

Open up totally. This is overblown

I am not concerned and feel this entire thing is blown out of proportion. This mediademic is a jok

will not go to grocery store when busy since they don't care about face masks

I have left business for forcing me to wear a mask and did not purchase anything

it seems that some people are over the virus and just don't care if they get sick or get others sic

I wish masks were mandatory indoors

I don't care.

None of the above - I feel safe and want all restriction lifted.

The most concernig issue for me is population density.

Other than grocery stores, I haven't visited any reopened businesses

Raley's in Auburn is a mad house. I will be avoiding from now on. So sad.

I don't care

I will not visit businesses unnecessarily. Placer County BOS has encouraged bad behavior.

I won't go into businesses that require masks.

Family was forced to wear mask despite beliefs, humiliating/offensive.

I have only been to grocery stores

This is al nonsense 0.4% mortality does not justify what has been done

I prefer no mask required business

Haven't visited many businesses, if not safe I don't enter or leave with out making purchase.

I won't do business at company's that require a mask.

Most businesses have signs but there is little done to make sure the other customers follow rules

I will go anywhere that is open and I feel safe everywhere, regardless of masks/social distancing

I've visited some businesses that I think are doing a good job, others that I think are not.

I feel there is a mix of distancing and mask using.

I will visit a business that says do what you fell you want but we are open as usual.

I have approached a to go food service and left because it was to busy.

They are encouraging, but not requiring.

My fellow customers haven't been good about masks.

The options all presuppose that masks and distancing are good. I disagree.

insufficient monitoring of face masks at local grocery store. No signage at post office.

I will not go to a business that makes me wear a mask

Some citizens of Placer are down right hostile to people about the maskS. We wear ours.

I have seen several customers not obeying rules.

It s unfair to put the enforcement obligation on businesses. Too many people ignoring rules!

I shop where I want, I do not and never have worn a mask, I have read a history book, excellent hea

Masks are stupid (cloth is worthless). social distancing is a bad joke (look at the protests)

Other than grocery stores, I will not go back to a business that isn't making me feel safe

I feel EVERYTHING should be OPEN NOW. NO RESTRICTIONS!

I am following the state's order and have not visited my home in Placer County since January.

I feel safe in any business

The restrictions on businesses are completely ridiculous and should be eliminated.

I don't think masks should be pushed unless absolutely necessary

I don't care about any of this. If a business said I had to wear a mask I would think twice.

haven't left home since february. 65 years old and alone no support system. too scared to go out.

I don't feel these extreme measures are necessary.

I wished I had voiced my concern in the restaurant where the servers were not wearing facemasks

I am an at risk person and won't feel safe for a long time to come!

I visited a barbershop, and the employees wore masks, and had set the shop for social distancing

Doesnt matter

I don't agree with the government telling businesses what to or that I have to wear a mask.

Masks and social distancing are the stupidest things I've ever heard of.

I stay home most of the time. I went to three businesses today. Three different approaches.

Mask use is very uneven and confusing.

I have only visited a golf course, which feel safe; but not all patrons there did.

I feel like 1.5 weeks ago almost everywhere was doing good, now pretty poor - almost back to 2019

I think the masks and distancing are absurd. It is up to an individual to go or not go to a busines

there's TOO many people on the area and I can't physically wait in lines to get into places

Nugget and Costco is doing a great job .Lowe's is not.

The virus is real, but the rest is a joke. we are being tested to see how we react to socialism.

We have only visited Home Depo, Safeway, and gas station, March April May 2020

I'm doing what I feel is safe and that's what matters to me.

I DO NOT visit businesses that inconvenience me with this politically motivated charade

It is customers who are the problem

I am limiting my exposure by only going to businesses that are essential. Grocery store, dentist,

I hear from others that there is a lot of inconsistency in enforcement of mask wearing, distancing

Most businesses in Plcr Co are following the rules.

At grocery stores, staff are not reminding people to keep their space and wear masks

I would like to see more people wearing masks when entering businesses.

I am only going to the grocery store.

I will not visit businesses that require cloth facemarks because there is no science to support it

I believe I have enough intelligence to figure this out without government interference.

The public does not appear to be abiding by the rules, regardless of efforts to comply by business

If a business is open, I feel safe regardless of any measures taken or not taken. I'm not concerned

I prefer going to businesses that are back to normal.

We wouldn't be "encouraged" to do any of these. This is ridiculous

A few are doing a good job but most are not. They try but customers are negligent. This is stupid.

I don't like the "guilt trip" about wearing masks.

I don't need them to do anything special to make me feel safe.

I think the shutdown was a global overreaction. Data says not as bad as first thought

I don't think it is necessary

I'm not overly concerned

I don't need masks or social distancing to feel safe when visiting businesses.

I would not visit a business that required me to wear a mask.

I feel like it's all too much and want fewer requirements on businesses

I don't know how you regulate this for an unwilling public. And they are.

I will not visit a business that forces me to wear a mask.

I am limiting my visits to businesses, especially where masks not being worn by workers/customers

I'm not super paranoid but I respect and will visit businesses that are making the effort.

Colfax businesses are NOT doing a good job of supporting masks

Make masks MANDATORY for grocery store employees and customers.

let us all be self responsible and open the damn state.

I feel business are doing what they are told but customers don't participate wearing masks and kee

If a business REQUIRES a mask, I will go to a different business. Masks do nothing.

Most businesses are doing a good job, it is the disrespectful customers that are the problem

I haven't visited many businesses.

I don't expect them to do anything different than normal. If a person is at risk they should stay h

I think most of the businesses are cooperating, but not all of their customers are.

Mountain Mikes in Rocklin doesn't abide by any of the safety guidelines

I would be fine visiting any business I feel to a large extent the coronavirus is being used for p

Nugget RV requires masks for all and I feel very comfortable there

Implement motivational consequences for those who endanger others by not following CA guidelines.

I would prefer it if businesses would require customers to wear masks while inside their stores.

Vast majority of businesses always are clean and safe or they wouldn't be in business

I appreciate a business that doesn't enforce masks or social distancing.

I'm not worried, so I prefer to not be forced to wear a mask or limit access.

Masks should be mandatory when our in public,

Depends on the store

It's nuts out on the roads again...I'm selective & careful where we go. I like slowly opening. I'm

I don't care about masks or social distancing. I would just like a clean environment.

I will not go to any business that requires a facemask

A mix of good and less good

I feel safe because I do what I need to do regardless of what anyone else does.

I think the whole damn thing is a false alarm and we need to get back to work and play

I only go out due to necessity. Business should require masks, if not I won't shop in them. Target

Pet Club needs education

I will not go into businesses that mandate mask wearing

Time to get rid of masks and social distancing

I wish businesses would put up a sign that says: No face Covering- Do Not Enter

I don't care about businesses adhering to any covid related safety measures.

Yolo county has better guidelines for reopening businesses. I feel more comfortable shopping there

Businesses are all doing the best they can in the current situation

If I see someone without a mask, I cannot do business there. They don't respect me.

I'm not worried at all about social distancing and wearing a mask.

I stay away from most that require a mask as I feel it is not necessary

hard to "police" all customers in some places (stores), but I think most are making an effort

I don't like the new rules businesses have to follow, math, social distancing etc.

Businesses are asking, but not all customers are doing it. That's what makes me worry

I want the decision to wear or not wear face covering to be left to the individual

I will not visit a business that requires masks and fear.

I prefer no mask requirement in businesses.

If a business requires masks I leave

I have seen both places that keep their businesses safe and well regulated and places that don't

Businesses are doing what they can to deal with the BS and stay profitable

I will Not go to a business that requires face masks

Let ya decide

These are not things I worry about

Business can't police their customers.. wear a make to get in but people remove them..

Any mathematical epidemiologist who has studied the previous epidemics knowsSwedish model was the w

all I have seen are following the rules implemented but personally I don't need them to be out

I had to visit businesses that were not wearing masks or following guidelines but try to avoid

It seems to be sporadic. Lots of people visiting business don't wear masks. Masks seem to be worn

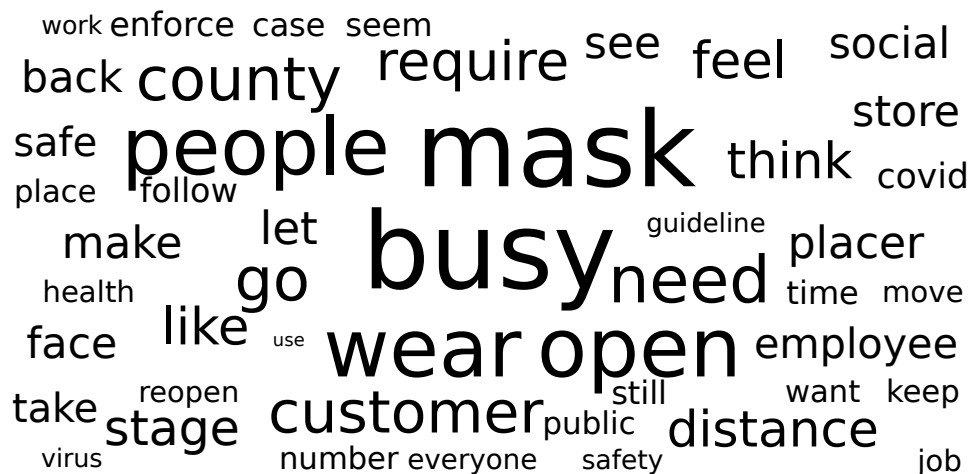

businesses not always wearing masks

I think everything about this virus is over stated and un necessary. Look at the science.

All businesses should be allowed to open. They should be allowed to mitigate risk as appropriate.

I will not visit business that require to wear masks and 6 feet nonsense. Stop scaring people!!

Q5 Any other comments or suggestions about Stage 2 business operations and expectations?  
(1259 responses)

Speed things up. This isn't Ebola for crying out loud.

I'm a senior and from what I've seen on TV, locally and nationally, there is no way I'd be visiting any businesses in the near future. Too risky. Too many people are only concerned about themselves.

Churches should be open in Stage 2, happy to see that some of that is happening now

I feel every business should post signs requiring patrons to wear face protection.

Make face coverings required

Let's open up but do it carefully so to minimize a 2nd wave.

Get over it. All the dire expectations from the news scare media never came to fruition.

Keep on doing the great job you're doing at Placer County Public Health!

Open up all the way. If people are allowed to protest and roam the streets with local and state encouragement, then all rules do not apply. Or, our government is hypocritical.

I'm concerned that opening too quickly will trigger a second wave.

Non

Open all businesses immediately.

Of course it is scary for all. We have to be cautious but people are hurting and the destruction of our economic community will happen or we are going to have so much debt it's impossible to overcome.

There are homes being rented for tourism in my neighborhood and I worry that Placer County in not enforcing this ban

Open up the nail salons.

People should realize that the threat of the virus is gone. They owe a responsibly to others to protect themselves as well as others.

Let's go to stage 3!

Love the Reopen Placer website. I think Placer County is doing a great job.

We need to open up businesses. The cure is worse than the disease!

Wear masks!!!

The forced economic shutdown was a huge mistake; a grand overreaction.

Would appreciate more guidance on personal expectations. More about businesses, less about can 4 people meet in a garden? Can use common sense but guidance has been more business based

The county is getting too lax on re opening.

Face masks should be mandatory in public

I wish all businesses would REQUIRE (not suggest) masks for entrance al the time.

Lift all restrictions and let's get back to living in the land of the free.

Everyone should wear masks!

Open up!! We have flattened the curve!

I wish mask wearing in public spaces was the norm. I think we are moving a little quickly and nervous about a spike

Let us get back to work so we can pay for all those who don't pay taxes

None

We need to get to stage 3 and beyond asap!

I am more worried about being hit by a speeding driver then this virus

I really think that we need to move beyond cloth face masks. They don't provide much benefit or protection. Would be better not to wear them at all if that method is acceptable.

I wish masks were mandatory instead of a recommendation.

Need to enforce face mask requirements of restaurant staff. Also, enforce proper face mask wearing of the baggers at Raley's!

Businesses need to keep employees and customers safe. As long as they feel they can do that properly and are maintaining COVID guidelines then it's good to see them reopen. My family has at risk individuals so we are taking extra precautions about returning to businesses. It's good to see businesses and people wanting to get back to work.

I would like to see business be able to get back to regular business hours and bit see banks and dmv and other places closed we need to go on with life and not be afraid to do business

Open open open!

Please open Gyms!!!!

Grocery stores seem to be the worst

I think there are far too many restrictions being imposed. I think COVID 19 has low transmissibility and masks really won't stop viruses. We are ready to go to stage 3.

I don't think masks are helping at all.

Keep opening ALL businesses please.

I feel as if it is too soon to reopen.

Quite surprised to see how many people with children including small business owners who don't Wear masks

A "no mask, no service" regulation. Same as no shirt, no service. It's a public health matter.

Go to stage 3!

I do feel more comfortable in a business with employees wearing masks, and I do prefer to wear a mask in stores because I assume there will be people without masks within 6 ft of me. I appreciate the loose guidelines that businesses have so they can adapt to what works for them within the guidelines.

Frankly the different layers of government have made it confusing. They have opened businesses that are face to face with customers but have not opened hotels where its fairly easy to follow the protocols.

I am personally not going out much still, once to Home Depot, a couple times to Ace Hardware (not all wearing masks). They are showing that touching contaminating surfaces is not the most likely way to catch COVID so I don't fear touching surfaces (and the solution is to wash your hands-simple enough). I would like to get a haircut and be able to use public restrooms in stores.

OPEN ALL of Placer County. The numbers just aren't there and peoples lives are being destroyed!

I would like more direction on expectations for customers. I also feel like there is sometimes a mixed message between focusing on they reopening of businesses and the economy, but then being told to only engage in essential activities.

Let's move to phase 3 ASAP!

Requiring rather than simply suggesting wearing face masks would make things much easier and better for everyone! There seems to be a lot of social pressure to NOT wear masks in public.

Lets get back to normal. If large groups can protest with a mask and not social distance why can't restaurants get back to 100% (and just encourage masks)? Can we reopen the rest of the businesses that are still closed (gyms , schools, bowling alleys, etc)? The hypocrisy is extreme after seeing both protestors and looters not social distancing, and yet everyone else is supposed to??

Please tell businesses they need to ensure employees and patrons are wearing face coverings and physical distancing, and notify patrons they are cleaning high touch surfaces often!!

We went to stage 2 far too fast and we will pay for it.

I think Placer is speeding ahead to Phase 3 and am worried (especially now with all the protests) that we may be headed for a major uptick in COVID cases, both here and across the nation.

Reopening should be determined by the Medical Officer not the Board of Supervisors.

The hardware store I go to had a sign that said that you had to wear a mask to come in . When I went back a few weeks later there was no sign but most of the employees were wearing masks. I asked about the sign being gone and they said they had to take it down because the customers made such a fuss about it. I am still wearing my mask if I go there.

Despite the facts showing that the lock-down wasn't and isn't necessary, every business I've visited so far has done everything they can to follow the rules and make people who are scared feel comfortable. It would be great if Placer County would begin to encourage people to lower their fear levels and get back to normal. This is a new disease that isn't going anywhere and has not had the death impact that has been pushed on people by the media. Too many of my neighbors are living under stress and fear and the impact of that is far greater

Get over it and lets get on with life people!

Skip it and go to the end.

Face masks should be 100% required, by enforceable order, indoors in public spaces.

The only business we visit are grocery and drug stores. I've noticed that younger customers are more likely to not wear a mask than seniors.

We should stay closed!!! The public is NOT taking precautions seriously to keep socially distant and wear face masks

I don't like watching workers with pouring sweat down their faces because of the mask. I feel so bad for servers and such. Their restaurants are hot establishments. I feel like if they're sick then don't go to work.

Go to state 3

ALL BUSINESS SHOULD BE REQUIRED TO MAKE CUSTOMERS WEAR FACE COVERINGS , SUCH AS COSTCO AND LIMIT THE NUMBER OF PEOPLE INSIDE AT ONE TIME.

I think we are ready to open up

Too many people are refusing to wear masks and practice social distancing. Business owners are not in a position to demand masks, and the few who try to impose standards get greeted with angry customers. This county is far too lenient in dealing with these people who do not believe COVID 19 is still a real problem for the community.

Where I realize the caution is well intended, I do not feel the amount of change people and businesses are adopting is warranted.

Some businesses, like Nugget Market, are doing an excellent job. But many others are not. Plus, there is still such a backlash over face masks. I almost always wear mine in public, but those who don't have an attitude that wearing a face mask is wimpy or wrong. Perhaps it's just the mentality of the county.

Businesses should inform the public of their requirements on a website, social media, other. It would help me prepare to visit or select a business that I'm comfortable with.

Masks are being overdone

To many we have seen on our occasional times out seems most not thinking masks important.

Employees are not uniformly wearing masks in Placer county businesses; neither are customers, esp. in Roseville and Rocklin. Their comments when asked are : "Its not a law, its a guideline, so I don't have to." It's very frustrating and I think that the Placer County Health Dept. should be more instructional.

Placer needs Daily live feeds on Facebook. Hawaii does a good job. I feel I'm in the dark with our rules.

GET TO STAGE 3! THIS IS BS!

BACK TO BUSINESS FOR ALL!

Food handlers should have the strictest rules.

Businesses have untrained employees, touching everything, no masks, no gloves. So they spread virus from one customer to the next.

I will not visit businesses that are requiring the use of masks unless absolutely necessary.

Let's get back to work!!!

Please get this county open!

Please, Please, PLEASE allow public pools and water parks to reopen!! Please!!

I see a lot of social media posts showing people not taking precautions when out. I'm also monitoring positive tests and seeing a huge spike since reopening. Is anyone taking notice of this? Is there a plan to do anything about it?

Disappointed that we're open at all until Covid-19 numbers come down in adjoining counties!

People need to wear masks in public.

I really believe masks should be mandatory until seating and eating. And once an individual is in a business, that they wear the mask properly, NOT under their nose or around their neck... it's just a game for them and very frustrating. And yes, workers must wear masks while working!

Why is social distancing outside different from inside requiring a mask?

The choice should be mine whether or not to visit any business. If my comfort level is low, I don't go. If my comfort level is high, I shop and probably buy.

Guidelines need to be clear throughout the county. It seems within city limits rules are different than in unincorporated areas. It's frustrating and confusing.

Maybe calling the business ahead of time to see what they require of the customer and if the customer is concerned, asking what the business is doing for safety (sanitizing tables and chairs, etc.)

I wear a mask to protect you. I wish that everyone would wear a mask so I would be better protected.

If customers aren't wearing masks, what's the point. Also, is no one noticing that Covid cases have gone up A LOT since reopening? Why are we trying to move to phase 3. Why is opening more important than health? Is it just that we're spoiled and we want what we want?

So glad we are proceeding with re-opening. I appreciate that as a responsible and caring government you want to do the right thing. That said, we are over it. Looking at the actual data this pandemic was NOWHERE NEAR the threat it was billed to be. Our only focus should be on rebuilding the economy

The guidelines to reopening are good but they're not being followed. Even in Costco that requires masks you have a number of people that just take them off inside. The rules do no good if many aren't following them. A number of hair salons are not wearing or requiring masks. I'm concerned about catapulting into stage 3. I think when you reopen these other places most won't follow those guidelines either.

Let's get back to normal.

Things are doing great. Open up and have faith in your community members to protect themselves.

Masks shouldn't be required.

I believe that we should go very slow in re-opening businesses.

Businesses should be open. The virus isn't going away and we just need to deal with it without ruining our economy.

I stopped at IKEA in W Sacramento today. They are still closed, whereas EVERY other store in that whole shopping complex was open and had hundreds of customers at Home Depot and WalMart. Complete nonsense!!

Roseville is the worst place.

Let's get on to stage 3-4. All of the businesses that I have visited have been doing above and beyond what they should have to be doing.

I would fully support faster opening IF employees would wear a mask and if the business required their clients to wear one. Costco is doing a fantastic job with masks - that's why I buy a lot there!!!

If a place requires you to wear a mask, I won't go because I know how to distance myself from others and it's not recommended for HEALTHY people to wear masks.

Let people make their own decisions

Very inconsistent on mask wearing.

Masks should be made mandatory inside any establishment. It protects others and makes it really easy to help stop the spread.

Just open everything up

No, we're ready for Stage 3. Many of us rely on tourism to survive and the county needs those \$ as well.

It seems there is inconsistency with what businesses are doing and what is expected of customers. Leaves individuals to decide for themselves where to go or not go and do what they think best.

Need to reopen more!! Also need better communication of who is open and who is not.

Keep opening up with less restrictions!

It's time to open!! Let's live life again!

This whole thing has been blown out of proportion. Let businesses open up!

Not sure who is required to wear a mask, or if its all just recommendation. I feel like those handling food should be required, but I visited a restaurant via drive thru and not a single employee within was wearing one, even though I as the customer in my car was.

I have been to several restaurants in Auburn, including Round Table Pizza, and none of them are following the Stage 2 guidelines. There is always several employees without masks and gloves, the majority of customers are not wearing masks, and customers are sitting too close together. I do not feel safe visiting any business in Placer County right now because they are doing a poor job of following the health department guidelines. If the County is going to allow them to open, then you need to enforce the rules with citations and fines.

If anything, most businesses are going way beyond what I need to feel comfortable. It has always been strange to me that grocery stores have wipes available as you walk in yet drug stores do not.

Businesses are doing much better than people. Seems like half my neighbors are already completely back to normal, with parties and travel, while the other half are completely sheltered in place still.

I would really like to see more enforcement of guidelines for businesses. Although many are doing an OK to good job, there are some which have been doing a terrible job from day 1 and don't seem to care.

Everyone needs to wear a mask to protect others. I understand why businesses aren't enforcing it for customers but I won't shop there in person if they don't.

Please instruct businesses to encourage people to follow CDC guidelines on masks, hand washing, disinfecting and distancing while doing business, but also, to limit the amount of businesses they frequent. More importantly, instruct businesses to ensure the safety of their employees, and to support time off they might need if they deem preventative distancing from the work place is needed without retaliation. Support the workers of the businesses, not just the business owners.

It is really not the businesses themselves doing a poor job, it is the customers. The psychology of wearing a mask gives people a false sense of security that makes them care less about the social distancing. I do not feel safe patronizing most businesses at this point.

It is time for Newsom to step back as what he is doing is not effective

Precautions are a waste of time

I would like to see the same safety precautions at every business with staff and customers following guidelines

Confirmed cases are rising. This will keep me from visiting businesses.

I think that all business should be open and treated as essential.

As a non-business owner I understand the types of businesses opening in Stage 2 but not specialized requirements to operate. Yes the general wear a mask, stay 6' apart, and limit occupancy well below that of maximum but are there unique requirements say to a hair salon.

The numbers of cases seem to be rising daily in Placer County. Maybe we aren't quite ready for this reopening. Although I haven't visited many businesses recently, most people were not wearing masks. Concerning.

I feel local and state governments should be a better job of educating citizens. I know many won't listen, but feel it is still needed.

Inconsistency = confusion. Some employees with masks, some without. Some businesses require clients masks, some don't. It would be easier if the city or county or state just required masks and distancing for all. Then we would all know the rules.

I've heard WAY TOO MANY business say they can do whatever they want because Placer County isn't enforcing any of the COVID19 restrictions, and only customer satisfaction is driving their compliance.

Glad to see more businesses are opening, I am also seeing a big jump in confirmed infections in Placer County, would feel better if that was explained somehow as to where those suddenly very high numbers are coming from, since only mostly people who have symptoms being tested, it seems these are new infections of people who are experiencing symptoms.

I have trouble breathing with a mask and have been delayed by kaiser for test due to covid, I can't explain myself in businesses that require a mask like the salon so I just can't go.

I do not understand why businesses that are not permitted to be open are continuing to operate. Fitness System, the gym on Lincoln has been open since the weekend of Mother's Day and is not following any of the expected guidelines for gyms. This public disregard for safety endangers the public, their employees and the economic livelihood of all other businesses. If people and the county supervisors TRULY care about the economy, they need to hold businesses like these accountable for their actions.

Open things up.

It's a mixed bag and I feel if retail / restaurant people are wearing masks we should too It's not forever

How much cancer are people - employees and customers - going to get from unnecessary overspraying of surfaces with cancer causing sprays?

Get rid of the stages and let the business owner/patrons make the decisions.

PLEASE! Mandate that we all wear face masks when in public together. Along with social distancing and washing hands this will help keep us safe. Plus, our essential workers deserve protection from the public by enforcing face masks by all. With two teen sons working at Target they should be protected from the public since their exposure is high. Lincoln is not doing this on their own. Also, why are local gyms open in Lincoln without any consequence? They are not suppose to open until stage 3 and they have been open for weeks.

The businesses I patronize are doing the best to their ability. I do not think you can require one to wear a mask when not enough are available to purchase and not all can afford to purchase them for themselves and family. I do have to note people bend the regulations to meet their needs. The doctor's office is only doing tele-health but can prescribe one to go to therapy to an in person visit??? This makes me think the doctors know something the lay public is being denied. I think there needs to be guidelines for recommendations on ventilation in businesses. My complaint is.. If you have money, you can do anything. The wealthy business owners have figured ways around the regulations regarding renting short term and the Bay Area renters have figured ways to rent long term and split it amongst other Bay Area families. Might as well just open up short term rentals as a lot of visitors are already here. Let the smaller business owners rejuvenate their businesses.

Some businesses lax on face mask requirements for both employees and customers.

Let customers know where they can submit anonymous information to health authorities if they are concerned about a business's compliance with covid guidelines.

We are part-time residents of the Tahoe Basin. We sequester in place, and try not to impact the Tahoe Basin when we visit. A week ago we went to Kings Beach to check our condo at Kingswood Village. We stayed inside the majority of our stay, but did take a drive around the lake May 29th. We were disappointed to see so many at the lake, unmasked, in tight groups. I believe we are still in a Pandemic and hate to see citizens ignoring the safety guidelines. Not only do these irresponsible people put themselves at risk, but they put others at risk. Lake Tahoe is the most beautiful lake in the world, and nothing will ever diminish that fact.

There is no consistency from business to business. It social distancing and mask use was much better a couple of weeks ago. I primarily feel comfortable going to Costco and Nugget because I feel they are taking the Covid situation seriously. Those who choose to not wear masks are creating a situation which forces people into further isolation by having to stay in their homes.

More needs to be done. We have seen more positive cases than ever this week in Placer County. Clearly, it was not safe to open yet.

Let my people go. Stop the silly fear mongering

I think the County should issue a mask requirement for all business reopening as most businesses would not take the stance to enforce masks for fear of backlash and harassment of their employees.

It's time to fully open! Enough with this! If protesters can stand arm in arm why can't businesses be open?

Too many businesses are run by people who still think the virus is "hoax" and are not as concerned with customer safety as they should be.

I think its too early to open up!

when does the tyranny end?

MOVE PLACER INTO STAGE 3!!!

The problem, in my eyes, is not the businesses but the customers who seem to value their "rights" above the health of their fellow citizens.

It was beyond reckless of the BoS to request going to stage 3 when effects of stage 2 cannot (could not) even be evaluated at the time. We are now seeing a spike in cases resulting from the Memorial Day period, but, per the BoS, are forging ahead with more business re-openings, tourist accommodations and attractions, etc. I'm glad that I'm smart enough not to just blindly trust others to make decisions that benefit me; I feel quite bad for those who are less informed, don't understand what's going on, and are reliant upon others (e.g., the BoS) for deciding what to do as such individuals are taking tremendous, largely unwarranted risks due to these re-openings.

What is REQUIRED versus what is REQUESTED? My local grocer has NO distancing, NO mask wearing employees and few mask wearing customers. They have lost me as a customer until there is a vaccine

Let's get moving into Stage 3.

Doing a good job at this time. We need to open up more!!!!

This just makes me sad that it has become political...it's merely being respectful of others. It's not hard to social distance and wear a mask.

Please require all business owners, staff and customers to wear A basic, simple cloth barrier mask. They work.

Let get back to business!! And I am really hoping Little league, school, and other summer activities can resume with little to no restrictions. Please!!

I see most employees wearing face masks at a business, but I'm not seeing customers of these businesses wearing face masks.

All patrons of businesses should be required to wear face masks if they are not eating. Markets in particular in the Tahoe area are not requiring face masks for their customers and I feel totally unsafe under those conditions. The same goes for retail stores. Face masks need to be required for everyone's safety. Please review your policies.

44 new cases in the last 4 days. When I am out the number of people not wearing masks and not social distancing is horrifying. I'm staying home, not shopping except for groceries until you all figure out that you're opening too fast. You are opening not because it is safe but because you have available hospital beds.

I feel we are ready for stage 3.

I don't believe masks and 6 feet distancing matters. I think you either shelter all the way or not at all. I believe the virus has run its course and that this is all unnecessary and frightening for our small kids.

I would like to see a requirement for all to wear masks.

Some people and businesses don't care and some do. Too bad we can't think about others and not just ourselves.

As I previously mentioned, I've only been to one establishment since we reopened. It was a good experience. Employees were wearing masks. The floor was marked with an "x" where people should stand in line to pay and the person at the register was disinfecting the counter and high touch surfaces after each customer. I felt comfortable and appreciated their efforts to keep the community safe. In turn, I was wearing a mask to protect them.

Went to pickup food order at the Fountains right after the Stage 2 opening. The center was relatively busy and I was the only non-employee I noticed wearing a mask. I understand it's an outdoor center, but still disappointed.

To me, the scariest poor compliance business is a bar because for obvious reasons people are less cautious in such conditions.

This absolutely should not be the new normal. I feel like this is not far off from the standard flu to the younger generation and maybe a little worse than the standard flu to the generation that is older than 65 and have underlying conditions.

There has been a steady uptick of positive tests in Placer County since we entered Stage 2. It would be great if we could shift from reopening to reimagining and give business an opportunity to innovate and thrive in the new normal.

I feel very safe going back into businesses. And it really helps my psyche and gives me hope.

The businesses are doing a good job of postings and limiting customers, but many customers are not abiding by the rules.

I would like my church to reopen.

I really don't think it wise to welcome hoards of people from other areas where the infection rate has been higher (like Sac & the Bay Area) to our area where we have had a very low infection rate.

I think as many restrictions as possible should be lifted, and people and businesses should be allowed to operate according to their own discretion. People are risk averse, responsible, and for the most part good. We don't need lots of rules and regulations to keep us safe.

I have not gone to any businesses since March. My husband goes if needed. He says most people don't wear masks and if they do they aren't on right or taken off as soon as they get in the store. I am pregnant and immunocompromised and have no interest in exposing myself to this virus.

Wash your hands.

Look at the data, not the fear. Open everything up. Fear is not a virtue stop pushing that on people. Thanks!

With cases on the rise again we need and we continue to open, I still support opening however we really need to enforce safety measures like social distancing, masks, and cleaning regularly.

Move to stage "the end" and let us live our lives.

Masks should be required not optional in any indoor establishment.

I think if people would just wear masks when in a crowd to protect everyone that would be the most help since most of us cant get masks that would protect ourselves we all need to protect one another

People are not respectful of others and don't care about spreading the virus anymore.

I think it's really important to continue emphasizing a NEED for masks and social distancing.

No masks or gloves. DISINFECTANT works better, social distancing is great too

This is far, far from over. Proceed with caution and wisdom ... learning as we go about what works and what doesn't. Beware of those who are eager to make money off of the pandemic and its victims.

Most customers do not wear masks. Some are directly harassing (Coughing and sneezing on purpose and on mask wearers direction. Deliberately not social distancing, I had someone follow me around the store in my space and coughing. Complained to the store, they did nothing. so I left without spending money in the store. The other person just laughed as they stood there while I complained to the manager) of people that do. Businesses do nothing about that.

Employees do not seem to uniformly follow guidelines, even within an establishment. This is inviting the virus to break out more in our county. It is irresponsible for the county to keep pushing to open up when we don't leave enough time to understand the impacts of what has already occurred. This reopening was not based on sound policy but political bowing to an extremely vocal minority of people.

Let's reopen!! All the data shows we should not be living in fear! I don't agree with this "new normal" and I don't agree with social distancing.

Face masks and social distancing should be highly encouraged.

When can we apply for stage 3? I need to open my massage business!! I feel safe everywhere I go and don't understand why I can't open when I have the ability to put safety measures in place. Especially when everyone is out protesting in large groups, why can't I be with one client at a time with safety measures?! This makes no freaking sense. I am so frustrated. I know it's not the county's fault but I'm still frustrated.

I wish more people would take this more seriously... I do not think we are any close to being "out of the woods" yet. I feel like everyone needs to follow the rules or we will NEVER get thru this pandemic...

So the whole gathering with other people is very confusing. If you can gather for a church service, what can't I gather at a restaurant with non family members. How is being in the mall with many other people any different than gathering in a home with a small group of people. When can we really begin to gather together.

We have had many new cases in Placer County since Memorial Day. And many people are not practicing anything safe that I can see.

Young people in particular still don't get it.

It seems things are going as well as we can expect. Roseville has done a good job with the virus keeping people informed, etc.

I have only visited grocery stores and one nursery and I felt that both businesses did a very good job posting covid guidelines; keeping a distance, especially at check out and sanitizing high touch areas.

it is apparent that masks mitigate the spread, as well as create a reminder to be cautious, and should now be a legislated requirement, regardless of the imbecile in chief's stupid behavior.

Isn't it obvious that we've grossly over reacted at this point?!?!? Why do you think the riots are so bad? It's because people, especially poor who have been hit the hardest, are completely hopeless. Stop this madness. All we need to do, all we ever needed to do, is shelter the elderly and sick especially nursing homes.

I've seen seniors forced to wait outside for 20+ minutes in triple digit heat with masks on! Very concerned about these requirements hurting during summer months.

Please have health dept inspect the restaurants, I visited one that was reusing paper menus.

I think things are a bit too fast reopening because folks seem to think "Hey, it's over! Back to my usual business & personal activities!" These folks don't realize "It ain't over!" Because it is not visible, like a fire or earthquake, they slacked off. We all need to be careful .

ALL businesses should open back up as they want to. If people want to wear masks, wear them. Don't require them. If people want to shelter in place, let them. Let the rest of us live our lives as we want to.

Enforcement! Enforce the guidelines and punish those phase 3 businesses that have opened! Why are you ignoring the fitness centers that have opened or reminded open during the shelter-in-place in Lincoln!?!

Nope, ready for Stage 3!

We need to go into Stage 3 and open Gyms immediately!

It's wonderful to see businesses reopen. I do plan to get back to shopping & dining at my regular places gradually.

Stubborn/ignorant people choosing not to comply are going to spiral us back into trouble

Post a Table of safety measures (business employees wear face masks, customers wear face masks, social distancing markers are on the floor at checkout locations, cash is accepted by the store, etc.) for Stage 2 and Stage 3 and use check marks to show those that are Mandatory vs. Recommended.

Like options for single use or on line menus. Also, prefer to self manage credit car without needing to sign with common use pen/stylus.

I'd like to see signage at entrances to encourage patrons to use masks. And I'd like to have wipes and/or sanitizer available at entrances of businesses. I haven't seen employees disinfecting high touch surfaces before or after patron use--charge card pads, door handles, indoor or outdoor tables, hand held pagers, gasoline pumps, etc

overall pretty good in Rocklin

I continue to minimize trips out of the house & prefer to go to stores that vigorously enforce mask wearing. I have not gone inside a restaurant or hair salon. Its not worth it, I can do without. I will patronize these businesses when more time has passed without a new surge in cases and when I am confident the business fully enforces all safety measures.

I wish masks weren't required

People have covid without symptoms, no one is trying to take away your rights, we just want to keep as many people alive as possible. Please require masking. If I can do it 8 hours a day at the hospital I work at, you can do it for an hour one day a week while purchasing groceries.

Would like to see the board of supervisors provide more leadership and advocate for community members to follow the recommendations

Public continues to NOT wear masks. Businesses need to make them mandatory

I'm not able to judge how well COVID19 regulations being followed as only go to Costco and grocery stores-they are doing great job.

GET it done!

We need to get more businesses open. Right away!

open it all up, its ridicules its been closed this long!!!!!!!!!!!!!!

More testing for tracking.

The one area that is completely confusing is travel. What are the guidelines to travel IN state?

lets get to #3

Placer county residents are all over the place with their personal beliefs regarding COVID. It is difficult to keep everyone safe when so many choose not to follow guidelines. I am very concerned with the safety of our vulnerable populations. I am also very concerned with visitors from other areas flooding Placer county because we are open

We need leadership and good examples of Covid pre-cautions from ALL of our elected officials. Businesses should be recognized by our Supervisors for using exemplary precautions.

I would suggest taking it slow and not rushing to stage 3. I would also emphasize not rushing back into youth sports! If professional teams are still figuring it out, I think we can safely assume we will need to as well. I think once those open up be prepared for skyrocketing rates because I already see sports parents not taking precautions around each other with their kids. Full disclosure- I am a sports parent and want to see youth sports back but don't see a need to rush it!

Masks NEED to be REQUIRED by all businesses, both for the employees and the patrons.

What is so difficult about requiring and wearing masks.

I would feel more comfortable shopping if all customers were required to wear a face mask.

If placer county is to remain closed than any paid elected PUBLIC SERVANT should forfeit their paychecks until Placer County is open.

I think, as a county, we are still not doing a great job of enforcing regulations on businesses/customers. MANY, if not MOST businesses I have visited are pretty lax, especially when it comes to what is expected of customers. I now limit my visits to businesses that stick with regulations and do what they can to ensure my safety.

Getting back to normal by understanding more about the virus and how I can protect myself and others

When will we know when spas for waxing will be able to open ?

Ready for them to open!!

The county should make determinations about individual businesses being in certain sectors so they can reopen. Some businesses are stuck in between a county not willing to support local businesses and state officials that don't understand the issues the small businesses face. Eastern and western Placer have different circumstances and needs. That needs to be understood and accommodated.

Masks should be required for everyone in an enclosed space

I think we should open as much as possible so long as we are not endanger of overwhelming our healthcare system. I don't know if this is true or not, but I imagine the weather is on our side...at least I suspect the spread of viruses are much slower. We need to continue to encourage sanitization.

The number of sick and dead prove that this is not a hoax. We must get back to work, but we must take it seriously until medical experts tells us this pandemic is over. ignoring reality is like rolling the dice.

I'm legally blind and all the signage is frustrating because I see it's there but can't read it, so it's not effective communication for me.

Thank you

We're starting to see increase in numbers yet rumor is still going to allow more reopening. I wish things wouldn't advance until after the two weeks of any large groups (ie Memorial Day weekend numbers are just starting, now we have protesting so two weeks from now we'll have increasing) these large gatherings are Possibly going to cause More increases along with the already projected increase.

Not clear guidance out there for recreation sites/facilities

I don't think Placer County residents and many businesses are taking this as seriously as they should. There are also businesses that are Phase 3 that are open (Anytime Fitness for example) that don't have a clue on reopening guidelines. Why are they still open and not have their biz license revoked or fined?

enforcement of the guidelines. Try to make people understand the danger of the circumstances

I would like to understand what businesses are doing behind the scenes in terms of making sure employees aren't coming to work sick. Are they doing temperature checks? Are employees getting tested?

One supermarket with employees not wearing masks, and some slighty bogus statement posted about "studies showing non-medical masks are not helpful." I had my mask on so I felt OK, but if was working in a supermarket I would think any mask on myself would be better than nothing.

It all seems so random & arbitrary! Hair salons open but not nail salons? When will playgrounds be open?!!

More businesses should have been allowed to open under Stage 2. I know it is State mandated, but some of it doesn't make any sense and is overkill for the situation. Let's get to Stage 3 now!

I'm tired of the government controlling our lives. Leave us alone and leave businesses alone. I want things to go back to normal.

I know this is not an easy thing, but I hope we can continue to balance economic recover with public safety.

Should have done it sooner.. time for stage 3

I believe too many types of businesses are opening too quickly. Which is more important, the almighty dollar or the residents of our area? No need to answer as it is obvious.

I think it was opened too fast. Numbers have gone up too fast. We are not staying safe! Too many people are getting it!

I feel masks should be required.

It seems like we have had a large spike in cases on June 2,3,4. Maybe we shouldn't have re-opened Placer so fast. I wish that Placer County board of Sups would encourage people and businesses to all wear masks.

It's ridiculous to pretend Covid is over. Stop pretending it's over because you want money, Placer County!

I'm not sure why you circulate flashvote since Placer County Board of Supervisors basically ignored the opinions of the majority from the last flashvote. Why do this when you're just going to do what the business owners want anyway?

There should be hand sanitizer available at every entrance and check out station at the minimum. Masks should be required to enter businesses where customers have to pass each other.

Please stop forcing employee to wear gloves. It doesn't do anything unless they change them between every customer. I feel safer when they clean hands often.

More needs to be done to get people to wear masks.

It's time to move forward as a community. We all need to do a personal risk analysis and based on that we should be allowed make our own decisions on what we want to do and not do. When we think about risk we look at many variables - what is the activity, where are we going, are we high risk, do we engage with high risk people, etc...this guides us to make our own decisions and live our life....this is what everyone should be doing at this point.

If there are patios or decks outside, businesses should make sure there is social distancing in those areas, too. And it would be good to remind businesses to keep customers informed by email or social media about what's happening at their place of business. Things can change, and customers or clients often don't know about the changes.

Just open everything and forget the COVID nonsense

If a business requests all patrons wear masks they should make sure they are at the door and employees should be wearing them correctly. Not under the nose. Honestly Goodwill is doing the best job I have seen

I think Stage 2 is happening way too soon, and will accelerate the spread of COVID.

I would really like to see more people wearing masks both business people AND customers. People are acting as if this pandemic is over.

I wish businesses would REQUIRE face masks. No mask no entry.

seems everyone is doing their best to follow what is recommended, however there are always some that either can't be bothered or do not think it refers to them, I am referring to fello customers not businesses.

It seems that many businesses are still closed or not offering even 50% of their services. Like banks, not sure if they are having issues getting people back to work or if they are just trying to save money but having to stand in 105 degree heat in a line because there is only one branch open locally is ridiculous. Seems like mom and pop or private businesses are opening quick where some of these big business/chains are lagging.

I am a senior, so I am continuing to observe the mask, 6 ft rule, and hand sanitizer BUT I am very surprised at the number of shoppers in the grocery stores that aren't wearing a mask, talking on the phone blocking aisles; really inconsiderate since there's no indication the risk is over.

I feel that all business and people should follow CDC guidelines for everyone's safety, health and well-being. It is impossible to get everyone to follow safety guidelines but we must continue to do our best to get everyone to participate and follow health and safety guidelines.

Bring on Stage 3. Open the churches. Restart the sports events. We need to live our lives. If you don't feel safe, stay home. I wear a mask in stores only because I want to avoid worrying the older and more medically fragile ones among us who may need to visit the stores. Always a good idea to wash hands regularly, use hand sanitizer and stay home if sick. Cough into your elbow. We don't need to throw these precautions out when we are re-opening everything.

Most of the stores are doing a good job. It's the customers that are the problem. You need more outreach to the public to just wear their dammed masks.

more in the LOCAL TV news of cases and deaths...in Placer Co...is it going up or down? I guess they don't want to casre us but it's helpful to knwo where we are in teh cycle...most folks will not abide by the rules if they don't know how serious it is. They blow it off...the rules.

I was completely disgusted by Walmart.... there seems to be no controls.... more than half the people were NOT wearing masks, no controls on social distancing.... seems like this was shopping as if nothing had happened. Won't be going there or ANYWHERE else that isn't taking the safety measures. Don't care how few cases we have had, that's BECAUSE of the social distancing... Sprouts is doing a WONDERFUL job... one way in, one way out, everyone in a mask. GREAT JOB!

Businesses will do better if the environments are safe!

OPEN before its to late. If you can attend a protest where hardly anyone is adhering to rule of mask and social distancing then you can open business and church's...

Advertise Stage 2 emailings, facebook, social media, mailing, news, etc..

Let's reopen! People should be smart enough to determine for themselves what is safe and what is not -- and choose how to proceed on their own.

Keep distance and encourage masks!

We will not contribute to the re-opening of the economy until businesses are taking steps to protect us. We continue to shelter in place and order our supplies from Amazon or other vendors out of the area. It's a shame because we typically spend a lot of money in this community and we would love to see businesses recover as quickly as possible. We would rather see local businesses fail that put our family's health at risk.

Open everything with no restrictions. Shackling the church while Costco is open is ridiculous.

I do appreciate increased cleaning, but I feel like the requirements are either too cumbersome or for show. For instance, many products require several minutes in contact with a surface to kill germs, but Walmart sprays a cart with unidentified chemicals right before releasing it to customers. This is both ineffective at killing germs and unsafe for the customer. Following actual recommended cleaning procedures would slow commerce even more. Other regulations are also very cumbersome and applied in potentially ineffective ways. Maybe we should just install handwashing sinks after the registers--it would be far more effective at curtailing the spread of germs.

Everyone should wear a mask. Employees deserve protection from customers as well

I would like to see a mandate that mask are mandatory in indoor spaces - why is this any different than mandating seat belts - this is a public health question.

I am confused on why business are opening (like basketball) but we still are not allowed to have small gatherings in our own backyard. It seems like exposure is higher at these places than with a small group of people you know.

Until there is a vaccine it would seem to me, important, for all to wear a mask. It is not going to hurt anyone to do so, and may help slow the spread. Yet I do not see any business other than Costco requiring them. I would like to see that changed.

The smaller businesses are much better at demonstrating how they practice following the guidelines. I'm disappointed that larger businesses are not requiring all their employees to wear masks. Additionally, I'd like to see businesses turn away customers that aren't wearing masks when required.

I'm glad to see businesses reopening safely.

Yes. Remain in Stage 2. New cases are being reported everyday. We do not need to "progress" to Stage 3 for at least another month. Let's see what an influx of visitors over Memorial Day weekend does to us before we step in it.

Please keep cardrooms closed

I'm avoiding going out as much as possible because so many people in placer county refuse to wear masks and are exposing others unnecessarily.

California can not justify putting any restrictions on people or businesses when protests consisting of thousands were deemed an acceptable health risk.

We're rushing things because of loud mouths and reps who actually don't speak for all the citizens. (Uhler is an attention seeking loudmouth.) Please consider safety first, not just public opinion.

Open the county back up!!! All parks and all recreational activity's including gym. These activities allow people to release stress and help improve mental health.

Boat inspection station should be opened for residents who have new boats(new to them but purchased outside Tahoe area).

Logical decisions based on scientifically proven facts (Much of this is not) should be the only ones made.

It's too soon to reopen without a vaccine

Let's get back to normal. Fabric masks don't stop virus. Hospitals have not been overwhelmed here. Let's move on to normal.

I think we should get back to normal but with awareness that people who feel sick should stay home.

Don't be in too big a hurry. Let's not keep the problems increasing

Too much focus on masks WASHING HANDS needs more focus. Small sized (all touchless water & soap) sinks should become a health code requirement at or near cash registers and in open public areas primarily entrance of eating establishments.

Simplify and inject common sense into the the rules for restaurants, bars/nightclubs. 25 or 30 pages of rules is ridiculous and is causing confusion and lack of compliance.

Thank you for all you're doing

Our initial concerns have been hugely over blown as proven by CDC statistics. The fact that we are not allowing people to get back to work is untenable. All business should be open now without restrictions. If people want to wear masks they are allowed to, if people don't want to wear masks they are allowed to. If a business wants to open then it should be allowed to. It is unconstitutional as proven by court cases in multiple states to force businesses to remain closed.

As a Truckee local, I feel nervous as I drive through town and Tahoe City. I see large groups gathered, little distancing, and few masks. I do not feel the tourist who are coming are being safe.

Locals know who is doing the right thing and who isn't. Sometimes the parked cars are all we need to see.

Open this up! With all the protesters out there not wearing masks - Why are business's closed? This is a JOKE. Get reall and just open up and allow everyone to open up.

Please make it mandatory in placer county to wear face masks. We have seen a ridiculous spike in numbers since businesses have been further allowed to reopen. Reopening the state has given people this false idea that everything is safe and COVID is no longer a threat, which is not the case. Those people are putting many lives on the line and the county needs to step in.

Please open nail shops!!!

grocery stores should have mandatory masks requirements for all employees and customers

I still prefer delivery and curbside pickup

I expect the Health Officer to manage the State Covid -19 guidelines for Placer. Testing, contact tracing, protective gear, and isolation needs to be completed according to guidelines. Opening should be data & science driven. Supervisors stop trying to push your self serving business agendas at the risk of residents' health.

I feel that most business think this is a joke.

How do I know if employees are being screened before starting their work?

Too many I've visited do not have their employees wearing masks. Upset about that.

reopen everything asap

Let's get everyone back to work. Safety is the responsibility of each individual.

As members of the community it is up to us to maintain our own personal health. If we don't feel comfortable we don't have to participate. As long as businesses are not putting people in direct danger and can reduce risk they are doing a great job. Please continue to allow businesses to continue to open and kids return to school and sports.

If I were concerned about my, or my family's, safety during this time or anytime, I would not go into the business. I'm an informed adult and quite capable in determining what's best for my family and I.

I have notice some businesses not wearing masks, I won't revisit those businesses.

I think it is time to open. The economic impact is going to be harder to recover from than any virus.

We need to reopen and help our economy! Those vulnerable should remain at home and the rest of us should be back to work and school.

I have noticed in different parts of Placer County and other counties that wearing masks seems to be optional. Most employees in my Holiday Mkt in Meadow Vista don't wear masks. When I asked the mgmnt. about this he said they were doing a good job keeping the place sanitized so didn't feel a mask was mandatory & nicely told me I was welcome to shop in other stores if I felt uncomfortable.

3 people in Home Depot on Fairway had masks, myself and two others. Not acceptable.

There are a handful of businesses that are doing well. The rest are not doing the basics and allow customers who ignore the mitigation rules. These should be cited.

None

We are still very well in Covid19 danger. Definitely we need the businesses to be going on. But we still need to follow all the necessary rules 100% basis, if we don't want the second surge. It will be un-controlable, if it happens. Disinfectant at the door, carts disinfected, limit number of people inside the business establishment, 6 feet distance to be maintained anywhere inside, vulnerable products to be disinfected, compulsory mask inside business for everyone, no exceptions, no loitering or time passing, etc., these rules should be followed with NO TOLERANCE.

It's a contagious disease, so doing what works to avoid exposure makes sense.

More physical distancing awareness and business enforcement

In Auburn, California citizens are not wearing masks--every day there are less people than the day before. In some cases even the workers in stores aren't wearing masks. People are also violating the rule of gatherings with more than 10 people.

I saw a hairstylist and client not wearing masks!

Our local and county leaders seem to be putting economic issues over safety issues. Very politicized.

Open up all businesses and let people take their own precautions if they have health concerns

This (shutdown) was never about entirely eliminating the risk for everyone. Let's keep moving forward.

It's inevitable whatever businesses and individuals do that the infection rate will keep increasing. Problems will not be resolved until mass vaccination is in place no matter what. Personal hygiene and protection (better than reusable masks) is more crucial than anything else. Lockdown is doing more harm than pandemic itself anyway. Using the pandemic for political gains of both parties is unspeakable, the pronounced division of the country and disrespecting the law enforcement role is very troublesome, more than the pandemic itself...

Let's not rush only to have a huge spike and then close again. It should be gradual and guided by science, facts, and evidence.

People that don't wear face masks should not be allowed in grocery stores or other retail stores, or restaurants.

My worry with COVID has always been with others. Others not taking precautions and those in charge not having clear restrictions for those not following basic safety guidelines.

We have to enforce safety first regardless of political and economic ideals.

I think masks should be a uniformity for all.

The county has done a terrible job laying out expectations and enforcing any safety measures.

Just open already!

I really appreciate the businesses that are posting and following health and safety guidelines. I really wish face coverings were more omnipresent.

My expectation and desire is that the County remove all Covid-19 related regulations, controls, etc. We are smart enough to take care of our businesses and smart enough to be careful as needed when we visit businesses. I think there are too many restrictions and published guidelines that are only going to be a problem for the public and for businesses. I know that once control is taken by government entities, it is hard for them to back off. Time to do so.

Let us open!! All the way!

Please move to stage 3 quickly. Let people make their own choices about where they will go.

Visitors (adults) w/o masks walking the neighborhood making fun of face coverings!

Businesses should not lose the current momentum to maintain cleanliness, sanitization, distance and face coverings due to the fact that COVID isn't going away anytime soon. Officials...elected and otherwise, should maintain proper leadership by demonstrating and communicating these measures.

Cases seem to be going up. Time to go back to quarantine I'm afraid.

There is so much disregard for the well-being of the community in Placer County. Very few people are wearing masks and physically distancing.

I am more and more adamant that I will not patronize businesses who do not, at the very least, require masks of employees. I believe masks should be required indoors for ALL Californians, but until that becomes reality, we need to protect those in service and retail positions, and we need to prevent them from becoming vectors to pass the virus to us.

Business opening permissions are extremely vague and not enforced by law. People are open when they shouldn't be.

It is important that everyone wear masks, stay 6' apart, and continue to clean areas.

I wish that all Stages (how many are there?) were publicized so that we could know where we are at as a society who wants to open back up and be "normal." I think it would be useful to have explanations as to why the restrictions are set at different stages. It seems that attending church shouldn't be a restriction as long as they maintain social distancing while together - not limited to a certain amount of people, just based on size of the building and their ability to maintain the distancing requirements.

Twice the number of deaths to suicide and drugs than Covid. We need remedies for seniors and at risk as well as mental health. There needs to be special times and openings so the at risk can recreate and socialize safely away from the people who just don't care.

I want to applaud one Supervisor for having some guts to stand up to Newsom and that is Kirk Uhler. It is quite an eye opener to watch and listen to our public servants on the video medium. You have plenty of self-important and overpaid prima donnas in there like the County Counsel and CEO or CAO whatever he is. These people are unelected burdens on representative government.

My husband gets curbside pickup 90% of the time. Please keep this up since so many people here in Roseville refuse to wear masks. I see the Covid numbers are rising.

Let's get everything opened including playgrounds, picnic areas, all outdoor activities, churches. People are perfectly capable of doing the right thing by protecting themselves and others. After all that we have been through this week with protests and rioting there is no reason for anything to be shut down any longer, please let us begin the recovery process

Don't understand the health guidelines. If hair salons are open, why not nail salons? Nail salon employees already almost always wear face masks, while hair salons do NOT. Both use sharp objects. Is there another reason for these guidelines, or just an arbitrary reason to open one and not the other?

Sometimes it seems that most older people wear masks and most younger people don't.

Nope

Exit this madness. What happened to personal responsibility? If a business wants to keep a customer they will find a way to accommodate their needs. If they do not then they will go out of business.

When are public swimming pools opening. My understanding is that chlorine kills the virus?

It seems that businesses are inconsistently following the recommendations. I go to Safeway, Target, Lowes and I see most customers and all employees wearing masks and practicing social distancing. When I visit Home Depot or Sportsman's warehouse, the only people wearing masks are occasional customers.

What the state and county is doing with this very slow opening, is destroying our culture and livelihoods and is our country!

The key here is educating older and at risk folks about protecting themselves and having better equipment to do so (I'm 65, FWIW) . We cannot afford to destroy our economy and the future of our youth's education via lock-downs. In my opinion, the energy spent trying to control all of society should be put behind us, and we should be doubling down on educating and equipping at risk groups instead, as the primary focus.

I see as I drive through Auburn that younger men and women (50ish and young)aren't wearing masks and keeping their distance. I'm over 65 and I'll do what is necessary to keep myself safe and Healthy!!

There is no direction being provided. Everyone thinks something different. Without direction this mess will simply continue

That everyone does the best they can for themselves, their family, and the community to keep everyone safe.

I went shopping and there was no stock!!!

Please just be more strict on either requiring distance and or masks of All people. It only takes one careless/rebellious person.

I think this is being drawn out too long and not healthy for anyone

I think masks by everyone should be mandatory. Strong recommendations is not working and many appear to be complacent and not wearing masks this week where they were a week or two ago. Many think the virus is over and that the virus was all a media hoax, which it is not.

Placer County should have mandatory mask requirements in grocery stores, post offices, and other busy public spaces. "Suggesting" masks isn't working. Maybe 50% are wearing masks at Safeway in Tahoe City. That needs to be 100% or it won't keep people safe.

Masks need to be worn and expected to be worn county wide. It has nothing to do with a loss of individual rights but of mutual respect for the health of those that can't wear masks or those with pre-existing conditions. If people wore masks, I'd feel more comfortable going into businesses and spending money.

I feel that there is not enough clarity from the county stressing the importance of wearing masks for their employees and their customers.

It's not clear what the expectations are, and guidelines are not being enforced. It also feels like when I wear a mask out, I am judged for it and feel pressured to conform to societal misgivings surrounding a general distrust in science. It's frustrating, I don't feel safe when I go out. Wearing a face mask shouldn't be a political statement, unfortunately it appears it has become that way.

I would be MUCH more comfortable if masks on employees were made mandatory.

I appreciate the County's efforts to educate businesses and the public.

Too many Placer Auburn / Colfax folks think none of the precautions apply to them. Nobody in any business does anything but signage about maskless customers. Less than half of Safeway/Target customers wear masks.

I appreciate businesses that set up special hours for seniors.

Neither businesses nor customers are doing what has been asked anywhere in Roseville I've been. And yet our county Board of Supes wants to push to go further when cases are increasing? We know what is going to happen if people don't get their acts together. This virus didn't go anywhere. Everyone just got sick of being home. Their complacency is going to get someone(a) killed.

I believe we are all adults, we know about Covid and our own situations and have to take personal responsibility. If I don't feel that a business is too crowded or isn't cleaned well then I can make the decision not to shop there. I am capable the wearing a mask if I feel the need, and washing my hands, and keeping my distance. I understand the reason for the government involvement and the initial lockdown when we didn't have the information that we have now and when our Healthcare system wasn't prepared. Now I feel that the curve has been flattened and that we can make our own decisions about how to protect are family members or ourselves if we are at higher risk.

Let's move onto Phase 3 asap!

Ready for Stage 3!

I don't even know what Stage 2 means. It's such a perfect example of government bureaucracy thinking it's helping when it's not needed. Just let adults make their own decisions.

Check the rate of positive cases daily & respond appropriately. Not just, "oh we expected this, we have plenty of hospital beds."

provisions to increase outdoor dining in parking areas, etc?

Somebody needs to be enforcing face masks.

Some business, especially restaurants and my hair salon, seem to be following what I consider basic safety by wearing face masks and maintain physical distancing...others, not so much.

I don't understand why food preparers and servers aren't wearing masks.

There is much less visible cleaning of high touch surfaces. Partitions put in place to protect employees are sometimes too short, too narrow or just too small to contain saliva or sputum. It seems people do not understand the reasons to wear face covering or simply think that the whole Coronavirus issue is either a hoax or blown out of proportion. That or they are simply selfish or believe that since they feel good they will not catch it or become a carrier so they simply choose not to wear one.

face masks should be mandatory. businesses should be given disposable ones so there is no excuse. why is this even being discussed, it makes so much sense.

You guys are opening too much too soon. Kings beach is seeing a spike in numbers since businesses and state park opened. The Tahoe area has had more new cases in the last week or so than it did the month prior.

I've seen several instances where the business has all the signs up, masks, etc, but one or two of the employees do not wear masks, despite nearly everyone else wearing them. This practice is unacceptable in my opinion, there has to be some sort of Health Dept inspection ability and/or enforcement built into these "voluntary" guidelines or they are only nice signage and weak practices. Other places are doing great!

please move on to phase 3

It would be nice if second home owners could resist the urge to visit. Frequent reminders seem like the best method to remind them that non essential weekend visits are not allowed.

Without leadership, there are no standard procedures or common acceptance of said procedures. Where is OSHA? How are we to enforce recommended protocols? Until there is unification and adherence by the masses, I will stay in place, not shop except for necessities, not attend restaurants, and keep my circle very small.

Feel Ok where we are. Not ready for large scale events.

I am still avoiding most businesses as the use of masks isn't enforced at many. I will go to Nugget and Costco for groceries because they require masks of everyone, but avoid Safeway because both employees and customers are not always wearing masks.

I feel that with the proper guidelines we can reopen safely. but i think a lot of mixed messages to the business. plus government needs to stand behind business that ask you to wear a mask. Have seen some ridiculous tantrums from adults who don't want to wear one. threatening to call police, threatening to sue, threatening to come back and wreck havoc.

Let's make sure that we/they are taking extra precautions to protect elderly people and people with compromised immune systems. Otherwise. let's move on from this. We pretty much stopped the curve in Placer County. It's time to get back to normalcy. There are so many businesses and people suffering because of the shut down. Who is going to help all of them?

No.

Let us have our freedoms. Be Responsible and wash our own hands. Stay home when sick and use common sense as responsible tax payers. If there is a breakout? Quarantine the ill not the healthy.

OPEN EVERYTHING UP NOW!!! It's up to each business and each citizen how they choose to protect themselves.

It's unfortunate that some businesses are not following through. I feel like they are either ignoring scientific evidence or only watching FOX news.

More consistency in business practice and public expectations would allow me to go out more

There is a dire need for more clear, broad, and frequent communication from the city and county level on what is expected of people when out in public. There must be enforcement for people who don't comply. There MUST be broad communication that is visible to visitors traveling from outside of our community.

Open ALL businesses and STOP killing small business!

Follow scientific advice

We need to be very clear. Many people are still following a shelter mentality because numbers continue to climb while the other half are hanging out at Folsom lake in large groups and having graduation parties with large groups. When you wear a mask to a store I get a lot of dirty looks so I have resorted to going very early in the morning to avoid the stares.

It's ridiculous since science has proven that face masks don't do anything. Even the WHO says healthy people should not be wearing them.

If masks are required in businesses it should be enforced by the business

Almost no one has it around here. Most deaths in elder homes, no need to punish us all.

Are they recommended or required? The difference isn't always clear. Also, EMTs were called to my work in Sacramento and only 2 out of 8 were wearing a mask. Confusing and upsetting.

Get on to Stage 3 and 4 ASAP!

I think it is up to the person to make a choice about where they go (taking responsibility). I patronize businesses that are welcoming. I believe it is up to me where to shop and I prefer having a choice. I am not shopping places that are unreasonable such as Fleet Feet. I'll take my business elsewhere. :( I do not want more regulations, I.e. Being forced to wear a mask. Thanks.

Let's get opened up already!

Placer County needs to increase testing and contact tracing. Sacto tells all to go to Cal Expo. I haven't heard peep from Placer County, Rocklin/Roseville about testing spots. I don't really trust being out and about even if the county only has 219 cases and 9 deaths.

It appears in my area of Placer County, Auburn, Ca, most businesses and persons are not taking the stage rules seriously.

Skip stage 2, 3 and 4 and just open the country up again. It is enough

I am surprised at how many shoppers, some old and unhealthy-looking, have stopped wearing masks, even when employees are wearing them and signs are posted.

Our cases have spiked and our county is acting like life should go back to normal. I can't believe the amount of people not wearing masks - it's rude and thoughtless and I hate having to go into any business that isn't requiring them.

Restaurant employees should wear clear face shield. Cooks and prep should wear masks

Follow the science, err on the side of precaution. Eastern Nevada County has 6 new cases, I point a finger directly at Memorial Day tourism.

I think masks would prevent spread without social distancing and then some businesses could serve more people.

The curve is flattened. No one is getting sick this is ridiculous everything should open.

I'm all for not wearing a mask!

Not everyone takes masking and distancing with the same level of seriousness, so I am protecting my customers and myself as best I can and learning to be flexible. My store is my livelihood, so I don't refuse service to folks who don't wear masks, but I keep mine on!

Business indemnity for COVID infections of employees (primarily) should be predicated on adherence to published guidelines (masks, distancing, food prep, etc.) especially considering the current understanding of transmission is by exhalation in enclosed spaces (with limited/inadequate ventilation). This becomes 10x worse in the summer months as no one wants to crank up the aircon more than necessary which will adversely affect ventilation and recirculate the virus within those spaces.

Places are open, people are not wearing masks, social distancing has lessened, people are feeling comfortable and free to do as they please. I think Placer Co. has rushed to open for businesses and people's need to recreate, and are leaving people less safe with no way to actually insure our safety. I would rather have had support for business and for people people to have stayed home longer. Very disappointed in what seems like an economic rush. Understandable need on the part of businesses, but dangerous and contrary to what medical experts advise and feel comfortable with.

I just wish everyone would wear a mask....it is so easy and can help stop the spread.....so just do it!

Get moving into stage 3. We can have hundreds at protests, but I can't do bicep curls six feet from someone at the gym. What type of science indicates that makes sense.

I think Costco is doing it right. No mask! You can't come in.

About 50 % of patrons do not take this seriously, as they're not wearing masks or social distancing; similar to the idiots currently protesting!

I wonder if it would be helpful to ask people who enter where they are from (local resident or visiting from another county)? Not sure if that would help in tracing if it became necessary...?

I expect that county offices will open or at least put a live person on an information desk phone. It's nigh on impossible to get any answers on anything.

I am very confused about what to expect when going to a place of business. While some are taking every precaution, other are doing nothing and as a consumer, I have no idea if I should report the businesses that are doing nothing and how to report them.

People need to stop shaking others for not wearing masks. I've been told it was mandatory a few times. A couple of times I chose not to go in, and a couple of times I put one on. I'm following the rules that are posted.

Mask guidelines are unclear and not consistent. To me, if not all are doing it, it doesn't serve its purpose. If masks don't protect the wearer and staff wear but not customers, it's still not a safe environment. Either enforce it consistently or don't bother.

I think Placer County is doing an outstanding job across the board!

I think restaurants and bars should be given a fast track way to serve and have tables outside on the sidewalk or patio. I think stores should be encouraged to open but bring merchandise outside and do business transactions distanced and outside.

Don't bring in a "new normal"!!

I think having clear messaging is helpful. It's been so confusing, go support businesses, but only essential ones, don't go anywhere etc. I'd like to see more messaging about relative risk and comfort ability for families based on their needs. Eg daycare risk, eating out risk, what needs someone has and what they don't. How to reduce risk, instead of having friends over, only do that during good weather outside, and BYOB

I think that staff at businesses feel intimidated/ uncomfortable to enforce guidelines that customers are clearly ignoring, because so many are doing it in this area and are actually vocal about protesting social distancing requirements. At my own business we have had some Karens be very confrontational about not wanting to follow the guidelines we have in place (to follow County guidelines...) What a time to be alive in a red county

So far I believe that of all the businesses, including restaurants have shown remarkable flexibility and adaptation to provide a safe transaction.

Yes, stop dictating how they operate their businesses and let the customers decide. This level of government interference is wrong and needs to be stopped.

People-customers-need to understand the mask is mainly for the protection of other people-including the workers of the business.

Encourage patrons and employees to be respectful of others by maintaining physical distance and wear face coverings. While each person has their own opinions and comfort level, please respect others who may be overly cautious and/or at high risk by following guidelines.

There has been an uptick in virus cases in Placer in the last 2 weeks. Much more propaganda needs to be put out about masks & distancing so occurrences of the free-for-alls at the beaches & parks are contained. Also, admissions to these kinds of public spaces should be controlled, admissions limited, not necessarily shut down, & patrolled.

Please do not require face masks. Please open play and recreation for children. My kids lost the last 3 months of school and now are isolated at home and showing signs of loneliness and depression. Kids...well everyone really, needs face to face interaction with other humans.

Stop trying to bankrupt businesses, let them open and let customers/free Americans decide where they want to shop (or not if they so choose). This tyranny is outrageous! Enforce a crackdown on illegal riots, not law abiding businesses.

I'm concerned about the amount of misinformation and conspiracy theories circulating around COVID-19 in our county. A loud hopefully minority, are very certain it's all a hoax and are harassing people who are trying to follow the guidelines. More needs to be done and/or possibly different messaging/approaches are needed. For example, no mask no entry into businesses and also the New Zealand approach/messaging of we are in this together and wear a mask to protect others.

The majority of residents are not wearing masks, which is a big risk factor. I have continued to only visit businesses for essential needs such as food, and I will continue this indefinitely, because it is really not much safer now than it was in March or April.

I hope we move to stage three soon. I didn't understand that there was any expectation of long term closure of businesses to stop Covid 19. My understanding was to slow it so hospitals won't be overwhelmed, limit the number of cases.

**EVERYONE SHOULD WEAR A MASK WHEN OUT IN PUBLIC AREAS ESPECIALLY INDOOR PUBLIC AREAS. WE WILL NOT UTILIZE ANY BUSINESSES THAT IGNORE USING MASKS OR DON'T PRACTICE GOOD SOCIAL DISTANCING.**

I will be glad when we finally go back to normal business. The masks and distance sucks!

Make masks mandatory for customers and employees at all businesses

Some customers don't care about social distancing - I don't know if there's any way for a business to enforce this. It would be nice to have a polite, commonly accepted way of asking someone to keep their distance, rather than people reacting if you kindly ask for that.

Enforcement of masks to all customers is essential. Individuals with chronic conditions, like myself, and disabled individuals, like residents in my care facility, will not feel safe to visit businesses unless policies are strictly enforced. I have and will continue to move my business spending and personal spending to businesses that enforce all customers and their staff wearing masks. I consider establishments that do not comply to be reckless and discriminatory against individuals with chronic

health conditions and disabilities. This rhetoric that individuals with health conditions and disabilities should just remain SIP until there is a vaccine is disgusting. There is no reason the general public cannot wear a mask so that they can help protect the lives and wellness of those with conditions and disabilities. People with chronic conditions and disabilities make up approx. 40% of the population and they too have to perform essential business in the community.

The are quite a few businesses who have employees who think their mask only needs to cover mouth.

Everyone is trying to adapt to this situation. I do appreciate businesses that are doing their part and I will only do business where I feel safe.

I'm eager for all businesses to open.

I wish more people in general would wear masks for their own sakes and everyone else's sake. I see so many folks not wearing one. I wear my mask to protect myself and others, and I wish others would do the same. I visited one major business where most employees were not wearing masks. I won't go there again. Thank goodness their competitor is closer for me across the bridge. On the flip side, I also came across an elderly woman using the ATM midday that seemed scared of everything. As I went to sit down on a bench adjacent to the ATM, she moved away. She was skittish of everyone and she told a gentleman walking up to the ATM next to the one she was using that she'd like for him to wait because she hasn't been out yet and was trying to maintain distance from everyone. Folks that scared should go out at a less popular time or else have someone run errands for them. For the majority of folks out and about, wear a mask to keep yourself and others safe and keep washing your hands regularly.

The language "reopening" has a too wide reaching meaning for some folks. In reality, we will not be able to return to business as before. I avoid going into stores because too many are too cavalier or still remain ignorant of the high stakes. My daughter is an ICU nurse. The reality is very real to us. More clear care is needed in defining what it means to be "open".

Personally I have found that staying home is actually pleasant. I can still connect with friends and family on the phone/social media/etc., I get a lot of yard/house work done, and I have been saving money as a result. I am not convinced the coronavirus has disappeared and while I do not follow all recommendation to a "t," I feel as though I have protected myself and family quite well considering. I do not want to be part of any wave of the virus.

It is shocking to me that the protocols being suggested or required by our state leaders are not being followed by the very people imposing them, making them a bigger joke than they are.

California/Placer County is taking to long, turn the damn thing back on already!!

Lets get on to stage three

People and businesses need to follow the rules. Business owners need to enforce the rules with their employees and customers.

I feel like we are ready to move into stage 3. Businesses are responsible from what I have seen, and I am not very concerned about going out for my needs.

The CDC & WHO have both confirmed that masks need only be worn by those who are sick & symptomatic, or by those caring or in close contact with them.

More support from the county to help small businesses.

It is inconceivable that nail salons cannot open when hair salons and barbershops are allowed to open. The chemicals involved in nail salons would kill any virus that might be around. Another example of Newsom's need for power. It is highly discriminatory with over 90% of nail salon employees being Vietnamese women!

Lift all bans of businesses and churches. It's time to get back to work and living life!

Open up please!!!!

I would love masks to be mandatory in public spaces.

I wish there was someone going to these small businesses like the tiny Baskin Robbins in the 95747 zip code where most of the cases are and show them how they need to space people and limit who is in the store. I feel an outbreak could come from there. I wish everyone wore masks like in Yolo county. I see our numbers are jumping more than ever before.

OPEN PLACER

I cannot find any info on the regulations for social gatherings.

Businesses have been destroyed by a government that has taken away their right to operate in a free society. Residents of CA have been misled by a corrupt government that wants to be all-powerful.

We are challenged to follow distancing guidelines in local stores. Many are very small.

I've only been to a few places; grocery stores etc. I'm not going to high traffic areas.

Wasn't really even aware we were in stage 2. Still concerned about another wave from people assuming things are back to normal.

I'm waiting to see how things are going before doing much shopping in stores. I even shop groceries online now and then go pick up and staff puts the bags in my trunk. And limited online Amazon type shopping. What do I need at my age?

I think business operations are key for the economic health of this county and country.

In my opinion, the messages coming from the Placer County Board of Supervisors are sending out confusing messages. Our community must be safe and yet reopen businesses but our community is still shelter in place; which is it? Personally, I'm not comfortable leaving my home with the numbers of covid-19 continuing rise in our county. There are still some unknowns about the number of cases in our area. Also, attacking Governor Newsom is not beneficial and further divides our citizens. I'm thankful Governor Newsom shows sound leadership. I can't imagine how difficult this pandemic has been. Keeping California citizens safe is a priority and in no way does he benefit from having businesses close.

I'm happy we are finally opening. The statistics don't support being closed. More people have died from other causes than Covid19. Thanks for bringing us back from the dark ages. Are you young enough to remember the phrase " he has cooties" stay away.... That's what this seems like. And, believe me it's ALL cooked up hype. Amazing what has been done to the good people of our country and the world. Do many people have suffered. I'm just glad that no Covid19 patients were forced in to our clean nursing homes like in NY. That's so wrong. Infecting the most vulnerable. Thank you for doing your part to open up our local businesses. They need it, we need it. Hoping I was respectful enough. Just really don't agree with our state government. I was so excited when our Sups voted to move to stage 2. Stages 3 and 4 can't come soon enough for me.

Open all business. Let people decide what they feel comfortable with.

I think businesses are being very careful and doing their best in following the regulations as they have interpreted them.

Please don't rush into stage 3. The loudmouths clamoring for their manicures don't speak for most of us who want public safety.

It should be mandatory for all employees working near customers to wear masks. No excuses whatsoever.

It is time to open up businesses. Too many rules are politically motivated and have nothing or very little to do with public health.

Because we have a family member at high risk, we would not visit any business that did not observe strict precautions.

Latest data from CDC indicates the risk of the virus is much lower than previously publicized.

Don't turn away customers who do not wear a mask. It's a guideline, not a requirement.

I would like businesses to reopen as they were pre COVID-19.

They and their customers abide by the regulations by the State & County. I probably will not be visiting any business's unless absolutely needed.

Limit amount of people in stores

Masks and gloves indoors should be required for most individuals, in most situations.

Hair salons are okay but not nail salons? Makes NO sense!!

People in Placer act like this virus has just disappeared. I am pretty disgusted living here right now. It seems to be a me, me, me place to be. Sad

Why are not the grocery stores requiring face masks to enter? Costco and others do.

Being very cautious until the threat of COVID19 has passed.

I'm not sure which businesses are open or closed. If they could send an email or put a banner outside or advertise this, this would be helpful. A lot seem to be still closed. We'd like to see summer camps open back up. Things for kids to do: sunsplash, bowling alley, movie theatre. It's summer and our kids need to be around people their own age, having fun.

I think it is very important that ALL people in businesses wear masks and that is ample hand sanitizer available in the business.

Make it easier for citizens to report non-compliant businesses

Walgreens she home depot are horrible! Very unsafe. Michael's crafts amazing

WE NEED ALL BUSINESSES TO OPEN. LET'S GET BACK TO PERSONAL RESPONSIBILITY.... thank you.

This is ridiculous and we need to reopen everything before more businesses are destroyed. There are barely any cases here and nobody is even quarantining anymore.

Every employee should be wearing face masks to encourage their customers to also wear them. I love going to Costco because they will turn customers away that are not wearing a face mask. This is the new normal and residents of Placer County need to be doing what other counties are doing, wearing face masks every time we go out!

Businesses in Placer County in the Loomis/Penryn area are very lax. I have gone into stores and restaurants where no one is wearing a mask, and social distancing seems unimportant. It is highly offensive. The vendors at the Farmer's Market are the best at wearing masks. I have business in P.C My protocols match CDC and P.C public health recommendations. I would like to see more businesses referencing and practicing the public safety protocols.

would like county-wide order for face coverings so it wasn't up to the individual businesses - it seems confusing to many people of what they should do and why

Since we know the number of cases are increasing, the County should consider making face masks mandatory while out in public for the safety of everyone. We have a lot of senior citizens in the County, and we can't just say "stay home". It seems like some of the stores that never closed aren't doing a great job with social distancing guidelines.

I am angry that other businesses are making my business sector look bad because no one is holding them accountable for their lack of concern when most of us are trying to be good stewards.

We need to allow some more sports And lap swimming in public pools

Be considerate and not complacent

I think the businesses should be empowered by the County and State to REQUIRE customers wear face masks. Businesses should supply the mask if a customer does not have one and the State or County should fund the purchase of masks.

Businesses are not following County Health Dept. guidelines should be given explicit directions on what needs to be done to comply. And the 2nd notice of non-compliance means closure until compliance is reached.

Gov't to restrictive. Let Churchs operate

Believe that the Placer County health officer Should mandate the wearing of masks at least for all County employees. If your management believes that Covid-19 is overblown they are not encouraging wearing of masks. I'm working in a county facility where only a few people are wearing masks, and people are meeting and sitting two feet apart. There needs to be a stronger communication sent at least within the County. Visited a Lowes that was overcrowded and felt unsafe and disorganized. The Auburn farmers market was also very crowded with entire families attending, even though told not to! Definitely limiting my visits to stores and businesses. Fed up with ignorant people feeling their rights are being violated.

Thank you for supporting our freedoms in this controversial issu.

Let us keep up the good work. We will get through this one day at a time.

Mask wearing is non existent within Placer County. Our cases are spiking with 60 Known cases in 6 days. We had our biggest spike today and I'm not hopeful that placer county can control This. We should not be opening up non essential businesses yet, it is too soon. The county needs to have tougher expectations of people. Wearing of mask isn't too much to ask of anyone out in public. Make it mandatory if you're going to open up SO FAST!

3 of the past 5 days being all time highs in positive test results speaks for itself.

Customers and employees should be required to wear masks.

I think customers & employees have to be ready to understand that until a cure or vaccine is found, these precautions are needed. Fighting them and being rude to employees is not helpful or useful.

As a salon owner, I've had clients cancel after seeing a rise in Covid cases in the area. If we're open but people decide it's too risky to come in, then why lift the restrictions? At what point do restrictions go back into place?

Many businesses are requesting masks and social distancing but a large customers are not compliant. The businesses have no means of enforcing the guidelines.

Ready for Stage 3!!

We are tired of how the issues of masks and other safety precautions have been politicized, and are surprised to see how many customers at the stores do not wear masks. If people were making decisions about their own safety, that would be one thing, but they are endangering others. I will not support businesses that don't monitor social distancing guidelines, including masks. My dentist and doctor take the virus very seriously, why would I support a store or recreational business that does not??? If officials are listening to the loud voices that post government conspiracy theories (seriously or jokingly) on Chit Chat Auburn, they are missing the views of the quiet majority that will not engage in those childish debates.

I've been in several businesses where servers refill drink cups (leaning over the table and your cup, less than two feet from your face) and aren't wearing their mask (although they might have it around their neck); also, businesses with a barrier, which they lean around get closer to the customer. Many of the businesses don't seem to take the requirements seriously, although some definitely do.

I think it was too early for placer county to be allowed to go into stage 2. I dont see hardly any people social distancing or wearing any type of face coverings or gloves, especially in Auburn.

I am disappointed that more businesses that are able to open are not, except take out or curbside. I don't understand what's taking so long because we have so few Covid-19 hospitalizations in our county. I'm very eager to move into stage 3.

Get our businesses open! We know the rules and if anyone is uncomfortable in an establishment, they can walk out the door. This is absurd.

Business should require masks to do business. No mask, no business.

I have seen most people practicing social distancing with and without masks, and I am comfortable with that.

tell the governor that it is all bs and to reopen NOW

It should make it "mandatory" for people to wear masks and follow social distancing rules in public spaces, with certain exceptions. This way we can reopen and return to our activities without jeopardizing our safety.

I would expect to be informed if a given business is seeing a spike in COVID 19 cases.

Face masks should be required by law to get into any business

Wash your hands, avoid direct contact with anyone that is behaving in anyway unhealthy, cover your mouth with your elbow if you have to cough or sneeze, and generally do all the healthy habits you should have had before this whole thing started and you will reduce the potential for infection or contamination by a huge amount. Look out for yourself first and please don't berate or brow beat someone for not following your expectations or standards. Just avoid them.

Let the salons open with restrictions, i.e. face masks.

Open schools for full time learning

I hate that wearing a mask has become political. I feel the government needs to require it.

N/A

Restaurant staff should be required to wear masks.

We need to get over these stages and just open everything. Current protests prove that this social distancing and business closures have done zero to mitigate the virus, and we are stuck listening to guidelines from inaccurate "medical advice."

I think the Governor did a great job in preventing a huge outbreak in California and now our Republican Assemblymen are thanking him by suing him. We need to slowly get back to whatever our "new normal" is and keep the numbers down. People who mock those of us who wear masks should be asked to leave establishments.

masks need to be mandatory for all in public without 6 feet of distancing, all places of business need to require masks,

Skip Stage to and just open up everything. COVID-19 is an offshoot of SARS and there is still no vaccine for SARS so waiting for one to reach stage 4 California will never completely open again. There will not be a vaccine in a few months that is real.

It seems as though both businesses and customers are becoming more lax in following social distancing and mask requirements. I have only been to a few stores on a few different occasions, but have decided to limit my in store shopping based on what I have seen.

My employer requires employees wear facemasks. It ENCOURAGES customers to wear facemasks. A business can only do so much. What about where products come from? The people that package the goods shipped to merchants? I am not questioning what's being done for preventi0...just where else is this going?

Businesses may attempt to follow guidelines. They are reluctant to ask customers to wear masks and stay at least 6 feet away. Large retails like Costco and Target do a better job. I will not patronize businesses who do manage the risk for both employees and customers. People in this county are more worried about their individual rights than safety for others. It would be nice if leaders educated residents so they understand it is for benefit for all residents to follow social distancing and masks protocol.

It is well overdue that businesses are opening in this area. I do expect an increase in cases as a result, but that is expected and as long as people and businesses are practicing safe measures, it should not overwhelm the health care system. People who are not comfortable should stay home, while others go about opening the economy.

open AIR BNBs!!! They are TOTALLY Different and Infinitely SAFER than Hotels!!!

The government is supposed to do the will of the people. It is not their job to pick and choose which businesses will survive and which will go under.

Open all nail salons, library etc.

Can we move to fully opened yet? :)

OH MY , CITY AND COUNTY SHOCK AND AWE! They cut off their own tax incomes from total lack of any actions to prepare for economic disasters like good elected scouts,but are really lacking in taking any actions other than controlling what they created only after the losses. These are the same elected leaders that promise to fix potholes while antique dam foundations are failing. What next pray tell us, EQ, Floods, fires, mud slides, next Chinese illnesses? ? The tax creators are small businesses that pay for most all of these negligent losses are out of their earned money first. The feds are out of money they never earned, but borrowed from the illness exporters. You cannot take that to the bank even with an SBA guarantee. You can grant on that. Government employee promises about fixes are so very taxing. Maybe electing doers who complete safety and economic promises will work? American innovation is exceptional patience. Creating a new market for preowned politicians can work .

When will they be able to open?

Don't be sheeple

I don't think they should be open unless a vaccine was developed. Seems to be a political move only.

All businesses should require customers to wear masks.

Slow the hell down! Already a huge spike in cases in Placer County and we are just getting started with the stage 2 opening. I have found businesses that require mask for employees and customers (2 to be exact). Those are the businesses I will continue to frequent. Nugget and Costco.

I wrote a letter to the owner of Ace Hardware, cc-ing it to Public Health Officer, telling owner I'll have to shop at Home Depot unless his employees start using masks & observe social distancing. He called & left a message to "talk about it." I don't want to talk about it; I want him to comply

I'm still not going out much. AND I'm very disappointed at how few of my fellow residents are wearing masks.

All the signs everywhere are ugly. Covid-19 regulations are arbitrary at best. Let's govern with Common Sense.

Please move on to Stage 3

Restaurants seem to be hit or miss about following guidelines.

Make mask wearing mandatory.

The businesses need to lead by example

After spending the better part of two months in quarantine, I'm finding that a number of small business never closed at all.

At this point it's time to take care of ones self move on it a flu.

This took way too long for Placer County to open hair salons. Nail salons need to be opened. Most of these are run by women many of whom are single mothers. The Governor is not doing a good job.

Cleaning practices should become common place. Grocery carts should be washed after use. People put their children in them with dirty diapers, are frequently sick, place their service animals in them and place their children where the food goes. These should ALWAYS be cleaned after each use, no matter the season. Most stores are no longer cleaning the carts nor making supplies accessible for customers to sanitize carts themselves or they are not providing them the space to clean carts. People are not practicing social distancing for those trying to take time to clean their carts.

Move to Stage 3

I want life to return as it was like everyone else but we need to be smart enough to not create a second wave of infection

Where to find a list of businesses being opened?

Peaceful enforcement of Covid-19 protocols, such as masks and social distancing

Given the number of new cases in our county over the past week, clearly we rushed into this unprepared. Require masks, they work. It is the easiest thing to do to move forward with re-opening.

Let's go to stage 4! Done with this whole thing

Placer County needs to step up and lead the recovery in this area and push back on the current state administration's attempt at dragging this thing out for political reasons. The science and data have refuted all the need for precautionary measures and the lethality of Covid. People who feel at risk should still be encouraged to take whatever measures they feel will protect their wellbeing, but the rest of us need to get back to work and get the economy recovered ASAP without liberty robbing restrictions. Let's end this craziness now!

I feel like most businesses I visit are trying but customers are not complying and employees are also not complying.

Let's move on to Stage 3 please. I feel like this whole virus is a media and political circus based on fear and NOT facts.

I think our county is ready for Stage 3. We need our businesses to survive and by now, most people know how to manage the situations and limit exposures!

I only grocery shop at 6am with a mask. People are really not minding social distancing and the public need to wear masks to protect others. Not sure why the County leadership can't see that.

Businesses cannot be expected to create and enforce policies on public health. Local government leader ship is required.

we should get things back to normal especially in restaurants. very few seem to be open like they used to be

Businesses have done a good job preparing for our safety. Patrons have not - most stores are populated with patrons not having masks on inside, and those folks are not practicing distancing. They mock it when asked politely to move back

I believe we are ready to go into phase 3 of reopening as long as businesses and customers take reasonable precautions, including face masks and social distancing.

Sick and tired of the public preaching about their beliefs.

Open all businesses

Customers not wearing masks and not respecting distance is the biggest problem most places, but I have also experienced some places where employees weren't wearing masks too. Seems surprising that so many people are disregarding the mask recommendations.

It's going great. Open up more.

It's too early, and it's too dangerous, especially for businesses involving kids, who will go home, to friends & relatives, and potentially spread it.

Just open up the county. The hospitals aren't overwhelmed..stop moving the goal post

I am very concerned that people are not taking the pandemic seriously and there will be a huge second wave of illness and death. I feel masks, cleaning and social distancing MUST be enforced in any business that is open.

I'm disappointed that, by a long shot, people do not take these safety restrictions seriously. Sorry to have to report this. I'm high risk for Covid 19. I do not think I would survive it so back into isolation my spouse and I go.

Winco employees haven't worn masks throughout this. They've lost my business!

I feel most, but not all people are operating in a mode of safety and all businesses that I've been to are extremely aware.

I would like to see a simple website that outlines the key actions customers should expect to see at each type of business. This would be a means of informing the public short of their having to read all the guidelines for each type of establishment. It would put more pressure on businesses to comply.

No. When is stage 3?

Placer County and Roseville are doing a great job of getting information out. But, the state and national regulations for businesses to follow in many cases are so unreasonable and costly that it will delay opening because compliance will be so difficult.

In every situation where I've seen masks being worn - there is much more touching of faces (masks) and then touching pens, papers, groceries, etc. People are constantly adjusting masks, which puts their fingers right where we're hoping to avoid. I think masks will contribute to spread. I don't wear one because they make it difficult to breathe and cause me to touch my face repeatedly - I'm better off without one.

Slow down. Wait before going to stage 3

For most people, it is past time to move on. Regulators should provide options for businesses and patrons that are ready to move on.

I would feel much safer having a pedicure then being in a crowded Walmart. Customers wearing Masks in restaurants is useless

Masks should be required for employees and customers

Stop acting like this is more than a hoax Open back up....

Don't move too quickly! COVID-19 is still here and it will grow if we don't follow protocols.

If businesses allow customers in without a mask I will frequent the establishment.

I have been to several places of business and find that everyone is really doing a great job. I really have no complaints, except I sure would like to go back to my church! I'm sure we can all be mindful of all the safety guidelines by now.

We should not rush normalizing things. Safety first. No further loss of life if possible. Until we can be sure that the concern about safety has been reasonably addressed we should not rush.

I'm mostly concerned that cases have spiked after reopening, including the fact that the cases in eastern placer have almost doubled in one week. Perhaps the county should be more concerned about the health of residents and less concerned about whether or not tourists can enjoy themselves.

It's a mixed bag, some businesses have done an outstanding job of balancing safety with efficiency of time. Others not so much.

How come Dentist offices can open but not movie theaters or salons?

We need to open up small businesses!!

Seems like democrats wear masks and republicans don't. 🤔

Forget the masks ... forget the social distancing ... This is all ridiculous! ... Let's get back to normal

Move to stage three as soon as possible and then four.

Overall feel good doing business and as a customer locally. Still feel like people don't believe there is an actual concern for others with lots not wearing mask or making unneeded comments. Crazy how people still make it out to be an inconvenience to them when employers or businesses have their customers in mind by going to extra step in cleaning and having their employees wear mask or gloves.

need to put out guidelines for different businesses so the public can SEE what the requirements are.

I expect Placer County to close businesses that do not comply. We also need bilingual signage at the businesses.

Better safe and healthy than moving too fast and starting over....

I feel there's a real lot of confusion regarding when wearing a mask should be done

My hair stylist sent me an email with the rules and I had to respond that I agreed to the rules.

Several restaurants are not requiring staff including servers to wear masks. I wish it were either enforced or they had to publicly disclose if they were following guidelines BEFORE you get there.

Open churches and nail salons!

teaching people how to properly wear their masks would be good. (maybe illustrations? )

No. I have visited a number of places in California and Nevada during the Stage 2 openings for each state and I am really impressed with the business owners who are taking the regulations and laws of the reopenings seriously. I won't go into a place that seems to be crowded and that nobody cares about the social distancing laws. Just have not seen that yet.

Businesses where it is not possible to socially distance must REQUIRE face coverings. I am choosing to spend my money with establishments where face coverings are required. The BEST example I've seen is The Nugget Market. I feel safe shopping there and it's clear they value the health of their employees and customers.

none

It is imperative that all businesses follow all rules explicitly

Slow down! We are reopening way too fast.

I won't visit restaurants or businesses until I get a vaccine

Businesses that are unable to provide social distance for their customers must REQUIRE face coverings. A business that is doing a good job of this is the Nugget Market. It's clear they value the health of their employees and customers. I am choosing to spend \$ at businesses that require face coverings.

The number of people who do not think we are having a pandemic amaze me, friends and family alike.

Placer County should not reopen. The public is not protecting each other and our numbers continue to worsen.

Be consistent and allow more outdoor seating.

This whole Virus thing is a farce. I refuse to use any business that forces people to wear masks. I refuse the premise that this is dangerous enough to the general public that we should've shut down in the first place.

Open the darn county!

Education, education, education.

I do NOT feel our officials have clearly defined expectations to businesses nor have they supported or encouraged more stringent safety measures. Because of this there are many businesses we won't return to.

It is tiring but I understand why we must hold the course.

Having a number of medical professionals in our family whose opinions are not affected by government funding or corporate politics, we would prefer business return to operating as normal prior to the "CV" issue

Since the case numbers are now going up in Placer county, enforce the stay at home orders.

With covid 19 vaccines and therapy still in the testing stages, it appears that covid 19 will be in communities for some time before a vaccine and therapies are in place. Therefore, it is important that we learn how to live with this disease safely. We cannot keep our economy closed, nor can we go back to stage 1. We will bankrupt municipalities and small business owners if we do not learn to live with the disease. Since most people are able to recover from this disease, we cannot sacrifice our economy by being afraid to reopen. The question becomes how can we balance reopening and being safe. It may take years for a vaccine or therapy. We cannot wait forever. Even flu vaccines are not 100% effective.

Placer County needs to require that members of the public wear face masks until COVID levels decrease (instead of increase). A huge spike will bring even more economic impacts. If the Placer County BOS continues to push for aggressive reopening, I believe the citizens of this county should hold them personally and financially responsible for the loss of life and loss of business revenue.

It's disheartening to see people so oblivious and unconcerned with the safety of others when they are in stores with no masks and walking without awareness of others. I've heard conspiracy theories put forth with no facts, people who say we didn't need to shut down because only 4K people died in Ca. We had low numbers due to the PREVENTION that was put in place. We can only count numbers who were infected or died.....we cannot count what we prevented. I would like to see business be more directive on masks.

I feel it's a little soon to be opening up because I feel a lot of people think that the virus is gone and not taking appropriate precautions. I do understand that we need to move forward though.

businesses need to require social distancing, masks for everyone, and high cleaning standards. .any are not enforcing this with their customers even though they have signs posted.

It's unfortunate that protesting/rioting/looting has taken away from people being safe, not wearing mask or practicing social distancing. This is evident when you walk into most stores or take a walk at the lake.

Too soon to open. Lockdown should be extended. Schools should not be opened. Nursing homes should be more closely monitored. Testing should be available to any and all.

Open up and let's get going on getting back to some type of a normal life. I urge everyone to do some fact-checking and read the current disclaimers and proof that masks do not fully protect us.

Re-Open already. Enough with jumping through hoops to appease the Left.

At the Galleria, some stores are counting shoppers and limiting the numbers allowed inside. Yet, no one is monitoring the distances between customers waiting in the que. I would like to see 6 foot distancing markers outside the stores. People are bunching up prior to entering a store.

Masks should be Mandatory of all employees

Some businesses are not requiring masks. I only want to go to businesses that require masks.

Open up gyms and swimming pools now please. We older people lose too much muscle and tone staying home, and it's really hard to gain it back.

Ridiculous state government power overreach over hyped and exaggerated virus

I'm afraid it's too soon to be at stage 2

Please let us be free!!!

Get businesses open and back to normal already!

I hope the health officers are going out. I was at Tango Frozen Yogurt one evening to pick up a call-ahead order, and the employee was all alone, there were over 20 people in the store at once getting yogurt, none of which were wearing masks (including the employee), and their hand sanitizer station was empty. The employee told me they hadn't received any of their order of hand sanitizer, and she was so busy that there was no time for her to disinfect the high-touch surfaces of the yogurt dispensers and condiment scoops. Honestly - it was pretty worrisome. There were also large groups of people gathering on the patio with no thought for social distancing - and no respect for those of us who are maintaining distance. I'd been considering going to a restaurant now that they are opening up, but after this experience at Tango I won't (frankly they should have temp. closed while waiting for their shipments if they couldn't maintain county health standards for reopening under phase 2).

Newsome is an idiot and should be impeached!! First everyone shelter in place, but we need to let CRIMINALS out of jail and prison where they were clearly sheltered in place. Then it was OK if you were healthy to leave your shelter and come volunteer at his food banks. Lastly, law abiding citizens cannot gather with 10 or more, but the protests are encouraged and the attacks on cops, riots, looting, arson and property damage resulted. All this POS cares about is building a resume for a Presidential run!

More online information would be helpful, so I know if a restaurant has dine-in options or not

Placer doesn't seem to care that just because not a lot of cases now, don't need to use preventive measures. We will avoid/minimize contact with business' who don't care.

Physical Distancing and limiting the number of customers are top priority along with the 4 I selected. Masks should be a requirement in all businesses!!!

I believe everyone can make their own choices. We should not be forced to wear masks or gloves also all business should be open and let the market decide what people are comfortable with, not the government. This virus is not what we thought and our society should not be locked down because of it

I really wish they would let nail salons open. The girls always wear masks and gloves and sterilize everything anyway. And I'm sure some of those workers are really suffering financially since they probably can't qualify for stipends.

i just stay home or go out when necessary

I wish all retail stores would require masks like Costco does.

I would like to see more informative local statistics regarding deaths and intensive care: Age of person, physical condition of person, residence: nursing home, apartment, house.

no

I feel many (most?) people are not wearing masks and so are not interested in protecting others, which is very sad.

We are opening too soon. As COVID-19 cases spike in a couple of weeks, we're gonna regret this.

Visitors should wear masks indoors

I believe the restrictions are ridiculous, and ultimately more symbolic than having any impact on 'covid-19'. I do risk assessment for a living. There is truth in the statement that I have a greater risk of dying DRIVING to any business than I do

from contracting covid-19 once there. The standards are asinine. Regardless, I understand that they must be done and I support the businesses that perform them.

I find it dismaying that La Provence is forbidding employees from wearing masks. Also Bennett's Kitchen was very crowded 2 wks ago when we picked up food. No distancing! Servers with masks off their faces! We won't patronize places that won't comply with safety guidelines.

Vast inconsistency between businesses of the same kind

Ready for stage 3!

They should really follow the guidelines if they expect customers especially hair salons!

Open it ALL back up.

When I have to go out for essential business, I see most people not keeping 6 feet apart and the vast majority not wearing face masks. I went to a car repair shop in Colfax and none of the customers or the shop people were wearing masks or staying 6 feet apart. I also went to a bank in Auburn and only 1 of the 5 bank employees were wearing a mask and I counted 9 customers in the bank and that came in after me and only 1 was wearing a mask. I'm one of those high risk people going through cancer treatments and it terrifies me that most people are not staying 6 feet away or wearing masks. So, I stay home as much as possible and have not gone to any restaurants or retail stores.

Please move on to stage three and four as quickly as possible. Reopen the economy. Let individuals adopt the degree of caution they are comfortable with.

I think they should open businesses and customers can be responsible for their own safety. If they're concerned or worried they might be exposed to the virus, they should take necessary steps to protect themselves (use masks, stay home, etc.)

Let more businesses open! We need to be able to gather and do business. People need safe places for wholesome entertainment. Open open open!

Saying "Auburn is Open" gives the impression that anyone can do anything and the crisis is over. Many people and businesses are taking advantage of that. I have seen no businesses this week limiting the number of people allowed in the building. Most are not wearing masks. I hope we don't see a big increase in Covid 19 cases, because trying to re-establish controls will be very difficult.

At this point in the pandemic, herd immunity needs to be established. We are in full summer now with the best climatic conditions for fighting a virus. If we keep clamping down, this virus's cycle will take much longer to complete. Focus on the at risk populations.

As a 74 year old woman, I'm not that anxious to get out and mix it up with the general population. For now I will associate with friends who I know are taking the same precautions that I am.

Employees should be instructed that their face mask must be over the nose as well as their mouth.

Make mask required of both the business Employees and customers

Go to stage 3

we need some business open maybe they should have certain hours or days for certain groups to shop....this is difficult

I would like to see a list of which businesses have employees wearing masks and which are not. I'd rather not patronize businesses where the employees are not wearing masks. I also think that if the employees are wearing masks, likely that business is also doing the other necessary sanitation measures.

Move forward to Stage 3 & 4 now!!!!

Let's open everything up. Stage 3 should already have happened. We need normalcy. We need our lifestyles back. No wonder there's riots. People want to work. We shouldn't be confined to grocery stores & malls. We need gyms, pedicures and ability to travel up to Nevada. Newsom is an idiot. Quick to close; slow to reopen. A typical democratic rat.

When is stage 3

Let's speed up the openings!

The Auburn area is ready to lift restrictions so long as businesses take necessary mitigation measures proper and pertinent to each individual endeavor. The most important measures should be regular and thorough sterilizing, and reasonable distancing, in addition to employee screening daily for symptoms of infection from Covid-19. Signage should remind business patrons to respect social distancing, and of crucial importance is vigilance for symptoms of illness, with advice that patrons should refrain from entering the establishment and instead avail themselves of curbside service, online ordering and delivery at home.

Surprised when I have gone to a local restaurant to get a to go order and the employees were not wearing masks. Grocery store doesn't seem to do much. One way isles would help. Unfortunate they don't mandate masks like we do seatbelts. I don't go our often because of it.

Business should require people to wear masks for admittance. I know this is hard for them but needed.

Go to stage 3! The businesses that are stuck on stage 2 when others are on stage 3 is ridiculous!

We are in this together. Thank you for your caution and concern for others.

I'm still only doing essential shopping as infrequently as possible right now.

Make it mandatory that all customers wear masks!

Feeling relatively safe. We are doing about as well as we can do.

Do not open and do not allow employees to make their employees return to work if they have been working from home. Require employers to survey their employees working from home regarding anxieties. Putting people with different public safety beliefs together is dangerous. Mentally and socially dangerous for people and the community

Several organizations, businesses, sports organizations have adopted the sentiment of PC BOS and not taken this virus seriously. I will take care of myself, only support grocery stores and make any other purchases outside the county.

Do not mandate masks & please move into stage 3. This is out of control!

Signage I have seen in auburn businesses has been clear. Signage and reopening measures at my workplace are promising and make me feel better about returning to work

Concern that rushing to reopen too quickly could lead to more cases and a second wave of infection as in previous historical examples like the Spanish Flu in 1918.

No one person or e tutu is enforcing any regulation.

No more mandatory or coercive policies please. Data and medical research does not support it. I will not patron places further suppressing individual choice and discretion.

Businesses are doing a very good job of keeping customers safe

I haven't visited very many businesses yet.

Placer County needs to open

Patrons that don't wear masks at a business requiring them should be asked to mask up or leave.

Recommendations are great, mandates are creating division

Open with no restrictions this does not justify what we have done

Am concerned Placer County Health is under-playing reporting actual cases and trying to put positive spin on our numbers

Open them all up

I'm confused about opening. I can see that as a community we are not united (all wearing masks, all distancing) and that makes it hard to decide what's best for my family. I am worried that the inconsistencies will cause a spike.

It's too early. . . what's the rush? I know we need to help the economy, but I am NOT willing to endanger myself or my family by shopping in stores. I am fluent in curbside deliveries and pick up services. And the snippy attitudes of some people who are opposed to masks doesn't do anything to bolster my confidence that this is going to turn out well for Placer County.

I have not visited too many businesses to give good representation

I am in desperate need of my church opening for my well-being. I feel lost without my community and people. Additionally, I would appreciate nail salons opening. There are two things I do for my self-care, getting my nails done and going to church and it's been challenging. I know that it seems trivial, but when you have anxiety, I resort to biting my nails and having my nails done prevents me from doing that.

Customers should demand to cover their faces before go in the business

Businesses can "encourage" patrons to wear face masks and distance 6 ft., but they can't really enforce it - like at the grocery store. It surprises me how many people choose to go without a mask at Safeway in Auburn.

There is NO reason not to go to phase 3, it's time . Further , the use of masks unless you are sick is an absolute waste and not good for HEALTHY people in my opinion

I feel that the department of health of should have required that the residents of Placer County wear masks outside of the their homes for the safety of ALL people. Instead they leave of to people to do the right thing - which most do not so I as a person who has pre-existing conditions gets stuck at home. I feel as if I am not a valued member of our city & county.

It would be nice if businesses were to enforce wearing masks in their place of business. I understand it's not a mandatory guideline but since my husband and I are both in the "at risk" category, it would make us feel just a bit safer if everyone had a mask on.

Placer county is moving way, WAY too fast. We have seen our largest spikes ever in the last 5 days., including a growing number of sick children and hospitalizations. The general population is not wearing masks or social distancing and most businesses seem to not be taking this seriously. I'm ridiculously disappointed in this county, and the city of Rocklin. We need our local leaders to follow science.

I think employees wearing face masks should be required and people going inside establishments as well.

Open everything up!

It's very disappointing how casual everyone is regarding the large # of unnecessary deaths in Ca and nation from covid. If govt would not have acted, it would be worse.

I think it is up to each individual to assess the risk to themselves or those they come into contact with who may be at risk. It's time to acknowledge the initial projections were wrong and hospitals CAN provide treatment without being overwhelmed. For restaurants, in particular, allow as much outdoor seating as possible by using sidewalks, parking areas, even blocking off streets creating a food court.

Home Depot Auburn is the worst of all so far. AT&T store on Douglas in Roseville is a close second.

Parents should be asked not to bring children to stores, particularly if they will be wandering in aisles.

I had expected businesses to open a little more quickly but understand the work that is involved for them to follow all the guidelines in order to do that. Hope to see more opening and allowing in-person shopping and eating.

The news has seemed to drop this coverage. If it's still important then the news needs to show that it is!

We need to move forward, the true risk is minimal especially in this region. The entire process has been far too heavy handed on the part of government and we need to let people make mature choices.

People seem to think that since Placer County has such low numbers we don't have to take much precaution. But of course, that's not how contagious diseases work. I'd love to see more messaging about safety precautions that individuals need to take to prevent the spread. Just because a business is now open, DOESNT mean that we are all now safe.

I think this whole thing is ridiculous. I was on board with the Governor at first...but not anymore. I have more family members affected by the economic downturn than I do the "virus". And...what's worse...some people are making more on Unemployment with the added \$600/week...so they have no desire to return to their jobs. The whole thing sickens me.

I think all customers should be required to wear face masks at this time.

Open without restrictions. Let the public decide if they want to visit or not. Self regulation. The businesses will figure it out.

I love Costco, everyone has to wear a mask.

I think this whole thing is ridiculous.

Masks should never be required and gloves should be immediately disregarded!

If COVID-19 cases spike again I think it will be necessary to shut down businesses again to save lives.

The "I won't wear a mask" culture is blowing me away. I believe businesses in this area are afraid of losing customers if they require wearing a mask. Maybe if it was required??

Yes, I'd like to also add 'cleaning' as a choice...But only four were available. I also feel like businesses should be ordered to ask those not following the rules with masks etc. to leave

You've been doing an excellent job communicating about reopening and COVID-19.

Everything should be fully opened by now.

I think you are smart to do these surveys. I would imagine you get a good feel for how the people are understanding the County's directives.

OPEN EVERYTHING NOW. Get to full capacity ASAP. Enough of this nonsense!

In my community a lot of businesses have not forced their clientele to wear masks or enforced social distancing.

Some of it doesn't make sense to me but I am sure there is a method to the madness. Some of the confusion probably stems from the business that are choosing not to open.

There is a restaurant in the town of Loomis that charges \$2.00 extra for take out orders that they label "covid surcharge." I will never eat there again. It's taking advantage of customerz.

Just open and stop making businesses jump through all these hoops.

OPEN, OPEN, OPEN

While most businesses have signage the public has been inundated with signage and now I don't even notice signs anymore.

Our COVID numbers keep increasing. Are businesses expected to close for deep cleaning if a positive COVID person works at or visits one?

Open all businesses immediately. Why can we get a haircut but not a pedicure?

Far fewer people are wearing masks, and it's not okay. It makes me uncomfortable and puts my health at risk.

Just let business open. Hundreds are allowed to protest really over nothing and no one says anything. Let business open.

## SLOW DOWN

The local grocery store I use seems a bit lax. They ask employees to wear masks but do not insist customers wear masks and do not seem to limit the number of people entering the store. For this reason, I have chosen to shop elsewhere and use a local grocery delivery service.

Second wave will come because people don't take things seriously.

Generally, people are not continuing to wearing face masks or social distance. Business owners are doing their best, but if the public is not acting thoughtfully we are going to continue to have cases.

Very few businesses or people seem to be taking this seriously

Still a bit scary out there with this new outbreak and the protesters out there.

I'm still not very comfortable around lots of people - especially if they aren't wearing masks. That limits where I feel I can shop safely.

These stages are a ridiculous, unacceptable abridgment of freedom. Allow business to operate as they wish, allow people choose whether or not to patronize them, allow children to play youth sports if parents so desire. COVID-19 is real, but people need to be permitted to weigh life's tradeoffs.

Winco grocery is doing a terrible job. Employees are not masked, maybe half the customers are wearing masks, and definitely not monitoring how many customers are in the store.

As case numbers have been increasing this past week we need to look back 2 weeks and realize that is when these people were infected. Once we opened more in phase two it is obvious that businesses are not doing enough to keep it from spreading. Stricter rules need to be put in place if these businesses want to stay open.

I have not been to many businesses since the lockdown but I see some businesses are really doing a good job.

Open California

I think we need to get a jump on it because if this gets worse in the Fall, we need to strengthen our economy prior to that as well as take care of business that needs to be done before the Fall.

Just open every thing up.

Please urge businesses to prevent people without masks from congregating around entrance points. With only one entrance to the Bel Air grocery last Saturday, I had to pass through boisterous young men, talking loudly and not wearing masks, who were deliberately blocking the entrance. They were there for at least 45 minutes and no one dispersed them; perhaps the store had no authority? I felt threatened (I'm in a high risk group and was wearing a mask, but I couldn't get away from them).

Looking forward to stage 3

It's happening very patchwork. Some businesses I've seen are complying, some are not. So I leave if they're not. Help businesses come up with ways to be really clear with visitors about social distancing & managing numbers inside (if an indoor place). Especially at bottleneck points (like entering or exiting). Be really clear with businesses about what keeps them & other people safe -- it's not just 1 thing. It's all the things -- masks, sanitizer, frequent cleaning, etc. It's reality now. It's A LOT at first. The more we practice it, the easier it becomes habit. Help them set the habit. And help connect businesses with masks so they can provide masks to people who don't have them. The burden shouldn't be on the business. I just saw it play out today in a store. But clearly making them available will help more people use them. And it's about doing a small part to maybe keep the other person / the next person safe.

I'm very appreciative of the extra steps businesses are taking to keep everyone safe.

Masks should be mandatory for both customers and employees in all enclosed spaces

It's a joke really. More disinfecting less glove wearing and wearing masks the wrong way.

It's important we all stay calm ..err on the side of caution and resume normalcy as safely as possible.

Just open for gods sake

Businesses are mostly compliant, it's patrons that are not

The mass gathering of protesters with the blessing of politicians tells me I'm safe going to a local restaurant

No requirements for masks. I and my family will not go into any business that requires them. We are not worried about the virus.

My mom has Alzheimer's and is in small care facility. Not getting to see me (I normally visit daily) is causing her to decline faster. Please take that into consideration and allow at least one family visitor in situations like this. Thank you

Let them open.

There seem to be a lot of new cases of COVID-19, and I think things were reopened too soon.

Businesses that I have seen are doing everything right.

Hurry up and get on with opening all the way up.

I am concerned that the Board of Sups is pushing a reopen agenda that may be too fast for this region given the 33% uptick in the last week alone.

I will not shop unless I feel safe. All the guidelines need to be met.

We need transparency in Placer co numbers of cases and locations within our large county. There is nothing about the contingency plan if our numbers go up. With out public education and buy in you will have more difficulties is you have to re-instate stay at home order. We have enough chaos as it is.

I am NOT going to worry about visiting any biz. I only wear a mask if it is mandatory, I am not worried. Everyone needs to use COMMON SENSE - especially the Govt.

Have public announcements enforcing rules so we can remain open. Keep others safe follow the guidelines

If you want people to wear masks I think you need to have more info on proper Mask wearing Procedures. Have a Dr. do a video. People are touching their mask every 3 seconds. Not helpful.

Please slow down the re-opening of business. We're going way too fast.

I feel if a business doesn't take steps to keep customers safe by requiring face masks among other safety precautions , they don't care enough about me and I will not give them my business.

I think ALL businesses should require masks of their customers before entering. Period.

There is quite a range of customer compliance to social distancing and COVID-19 safety protocol.

I find they are all unnecessary! Look at the riots, and you want me to jump through hoops, sorry.

People are totally oblivious and have moved to ignoring any type of precautions unless the business demands it.

Stop the government murder of small businesses while ensuring the ability of "protesters" to put them further in the ground.

We need pools to be opened...it's too hot

All the data collected shows covid-19 was not an epidemic or dangerous for any group except 60 years and older. If this group was the priority and focus from the beginning, then Covid-19 is less harmless then common flu.

We shouldn't be open for phase 2 because we haven't met those benchmarks. The district caved to certain voters, not the district as a whole.

I would love to see the county require masks like other counties in California and figure out a way to enforce it. Even types of businesses that are supposed to require masks just put a sign on the door saying masks required, but let anyone through the door wearing masks or not.

Open EVERYTHING NOW!!! NO RESTRICTIONS.

Keep in mind those in high risk categories. Don't show a lack of respect and force us into another quarantine.

More public education. Explain why. Teach people options for how they can have fun vs other options they might choose. They need to know the differences!

Open all businesses, churches, concert etc. We have been victims of bad medical science and models.

Are gyms supposed to be open? My local gym opened up!

We are going out once a week for food. Costco is doing an excellent job while Winco is marginal regarding face masks. Have not gone out to eat but have used take-out several times. Looking forward when this is over.

Until we see the number of cases going down, not up, I'm not particularly interested in moving to Stage 2 completely, and do not even want the county to start Stage 3. We don't have enough testing and tracking to do this. I'm not going out at all, except for the very essentials like food. I will not see a hair dresser, go into a clothing store, or most stores in the area because most don't seem to care at all about requiring customers to wear a mask and neither does the county require stores to do so. We still have a long way to go, unfortunately, and wishing it were not so does not make the virus go away.

Let's move to Stage 3!

I strongly believe the government's response to the coronavirus was orchestrated by liberal democrats to crash the economy, ruin small businesses, and derail Trump's chances of reelection. All "stages" of reopening should be abandoned and all businesses should be opened immediately without restrictions.

Wearing a face cover is the most respectful action we can take towards other people. It is easy to do and with all due respect has nothing to do with "freedom." Some stores, e.g. Big Five, The Oriental Food Store, have clear, posted public health instructions which is encouraging. Really helpful.

everyone should wear masks

This is all BS

Covid cases are on the rise in Placer County. We should not be reopening. Placing the almighty dollar over the safety of our citizens is foolish.

I totally support opening businesses AND the need to be safe until the virus is gone.

Let the gyms open

People are blowing off precautions. Large restaurant packed, bar packed, awful..

I am astonished at how many people are not taking this seriously, even moreso since we started "re-opening," which as the experts have said, was too soon. We need more testing and more preparation. And now Placer wants to invite tourists back?! Seriously?! Let's take it slow, see what happens first, before we add fuel to the fire.

We need to open the state totally now!

Shut it down. People are stupid and not ready. We are going to be obliterated

Many fast food restaurants are doing extra steps to protect themselves and costumers, while there are a couple of restaurants who aren't doing much to abide by the mandates. I don't visit those restaurants anymore.

It's time to move to phase 3 and let people get back to work!!!!!!!!!!!!

So glad to see businesses reopening. My experience has been that businesses are doing a better job protecting customers than customers appreciate.

Reopen Placer County as soon as possible.

I have been surprised at the larger stores and the randomness of following guidelines. Home Depot although limiting the quantity of people in at one time, almost 90% of their employees I saw were not wearing masks. I thought employees had to wear masks? I appreciate Costco following the masks, limited entrance protocols being followed. The public can choose to go or not, but at least I feel Costco is doing their part to create a safe environment for those who want to visit. I don't think by "having signs" that is enough. It seems to be a "check box" then they can open. You don't really see a difference.

your survey are one sided

I am not visiting businesses. So sorry

Respect people's right to wear or not wear a mask. I think this whole thing is is a dumb dog and pony show.

It's confusing as to what is acceptable and what is not. Seems from one business to another its a different set if rules.

I'm still unsure which business are open. I doubt think they are encouraging the masks or social distancing as I answered in that question BUT that's not their job. It's up to the customers to manage their own space and do what they feel comfortable with.

Some of the requirements are obviously one-size-fits-all but so much depends on the physical arrangement of the business I'm not sure how else to do it. I am happy our local numbers have stayed low.

I think it is ridiculous that some stores must strictly limit the number of customers while other can let in many more customers.

it's confusing. federal guidelines said we should have waited till cases declined for 2 weeks before reopening. i watch the county website every day and the cases have been rising slowly. in the last week the number of cases has been increasing substantially. i don't think it is safe to go out...especially if you're 65 like me, other health conditions, no support system and alone. my health equals my independence. i think everything was opened too fast and i think we will pay the price for it in lives and extended period of time we are impacted. i think it was reckless. i know there are a lot of excuses why you opened up, but i still think it was the wrong decision. i hope i am wrong. time will tell. i get all my food from amazon. i live in a rural area, no delivery of fresh fruits/veggies. don't want to go out and have physical contact at all. i won't even get together with my neighbors. just trying to stay safe. i'm the only one around me wearing a mask. everyone acts like normal

Reopen CA

It appears that everyone, unless required by an employer or because of underlying health concerns, is making their own decisions on what they should or should not be doing.

Wearing masks and social distancing should be a requirement (not an encouragement) for all businesses and people who patronize them. Their lack of strict adherence to these safety requirements is endangering the health (and possibly the lives) of those of us who do practice them.

I will not go to ant business that does not follow all the guidelines

face masks should be mandatory now. Make facemasks easily available

Let'd get things reopened with caution and responsible care

Let's get past Phase 2 and get this economy and churches back open. It's not allowed to go to church but it's okay to demonstrate and ignore all social distancing and masking. Double standards and discrimination against other large gatherings.

It looks like most customers have abandoned the idea of wearing masks. They feel they are invincible.

If not going to enforce protesters to wear masks & distance, then just open everything up already.

Clear guidelines for all of us to follow would be helpful.

It is helpful to enumerate the specific types of businesses included in the Stage 2. I have had to check Google to see if where I want to visit is open or not. The hours of operations are also helpful, especially for seniors over 65 who have other vulnerabilities.

MAKE MASKS MANDATORY EVERYWHERE.

Open already, please!

I don't feel that businesses aren't following the rules, they're making their own. How can nail places not be open but groups of children are playing basketball at Hardwood Palace? Every playground has children on it, soccer teams are practicing. Rules haven't been enforced at all and the growing numbers of positive test are reflecting this.. I feel our county is more worried about tax revenue than Safety. I feel that the less than 3% we've tested is inadequate.

things should be cleaned regularly however this social distancing and facemasks are a joke.

I am glad we are opening up! We can safely do this!!!

I have a home in Truckee where businesses are doing a good job. Near my home in Loomis businesses are not. I have a compromised immunity system, but want to survive to see my grandchildren. I need businesses to wear masks.

I am pretty much staying home and watching to see how it works out.

I am avoiding high traffic areas like walmart as no one is masked and kids are still sucking on handles of carts. I only go to Michael's and Savemart as they have good cleanliness, masks, and Michael's limits number in the store at a time.

Wearing masks in public should be mandatory. The corona virus has not gone away and we don't have a vaccine yet. I have family and friends in Asian countries and they are doing so much better than we are because they are willing to put others first and wear a mask.

I wish everyone wore masks

When it comes to eating out, which we love to do, I am concerned about what happens in the back in the kitchen. I know I should feel more safe, but that is where I can't see. I would like to go with another couple but I wonder if we have to separate to another table since we are not part of the same family unit. Time will make me more comfortable.

Still difficult to get a clear picture of what the plan is

Business are not requiring customers to wear masks.

People need to wash their hands and sneeze into their elbows or a tissue. That's all that's necessary. Let's get life back to normal

The government is causing severe damage to our communities and state. They want us to pay for their fear, panic decisions and reckless use of taxpayer money. They denied business owners their RIGHT to make a living!

We all know that this thing isn't over but we are now looking at "quality of life"... open up and let us make our own decisions again..

I'm amazed at how much expense local business have gone to in order to protect their employees and customers. Lucite shields, distancing floor signs and hand sanitizer availability, counting customers in and out. This is new to all of us, and I think our local businesses are doing a good job.

Open up the businesses

We need to encourage more businesses to open. It is essential for the overall well being of our community.

I wish everyone was required to wear masks. I always wear mine and others not wearing it makes me feel unsafe

Small businesses seem to do better. Ones that have been open all along as vital businesses are more relaxed than those newly opening.

I think this is a tough situation for leadership to navigate through. People are getting angry, cabin fever, and the economy is getting really challenged. I hope the curve doesn't get worse, but I am very concerned it will. I am doing everything I can to help it. I don't feel the majority of people in Placer County are doing that. I think they are really frustrated or in denial about the issue because they haven't really experienced the truth of COVID-19 infecting their loved ones. I hope it doesn't take that get them to wake up and take the necessary steps to proactively keep our community and others healthy and strong as we work out the best way to overcome it. I plan to take the least amount of risks possible. It really concerns me when others don't care about other's health, well-being and safety. I wish people could see that freedom is in health and well-being, not in doing whatever you want whenever you want irregardless of other's, fellow human beings, neighbors, and life.

So glad to be able to start going to my favorite places again

Glad to be able to start going back to my favorite places

I find that I feel irritated when businesses or other patrons are not taking this seriously and treat it in an offhand way.

With Stage 2 Reopening underway, it's important that businesses understand the COVID-19 is a virus (airborne). All employees handling food MUST wear masks and gloves. Disinfecting wipes or sanitizers s/b available to customers. Needless times I'm told, the carts (grocery) are wiped down every morning. What the heck does that mean? How many people have touched that cart over an over during the course of day?

Please do not go to the next stage. It is too soon. Businesses need to do better at stage 2.

The public largely doesn't wear masks which keeps me from frequenting most businesses.

Why do people confuse health guidelines with their political views? Haven't seen any research that shows the virus affects the lungs of Republicans and Democrats differently

We are going to fast. Numbers are on the rise. Please slow down so we can get a hold of this in the long term.

It seems like the main problem with entering Stage 2, is that so many people are no longer observing any restrictions at all. They act like the threat of pandemic is all over.

The face mask "police" need to worry about themselves and do what they need to do to feel safe. Harassing others and businesses over it is not cool.

Interesting how law abiding citizens and businesses have to jump through all these hoops yet if you want to loot, destroy businesses & cause a ruckus, no one gives you a second look? Just an observation...

The number of cases in the county is rising. Are you going to tell people?

Not sure what business is allowed to open.

I think it would be helpful if businesses posted the Stage 2 expectations & both abided them & tell us how to abide. I went to a business & was not sure what to do. They were masked & cleaning. Lots of ppl there some in masks & some not. I had forgotten to wear my mask & got dirty looks from some who were, at least their eyes said that. I was confused about distancing also.

I suspect we are about to revisit the experience of the 1918 flu pandemic: a lull in the summer followed by the pandemic roaring back in October.

Stay closed, or the worst is yet to come

No, however would like to have some sort of idea when stage 3 will open which includes personal services "massage"? It's necessary for my health

Would like to see the county dashboard include negative tests for that day, so we can stop speculating if the increase is due to ratio of tests now given or an indeed rise.

Glad that businesses are reopening for those that want to get out and about!

This is a fiasco. You quarantine the sick. There is no CoVid 19 around here and it is hot outside. 102 yesterday. The virus is fragile in the heat and does not survive. All business should fully open now.

The rules are arbitrary and inconsistent. Open all and individuals can mask up if concerned.

The whole mask thing is unnecessary and annoying.

I take care of myself by using distancing, wearing my mask when I need to, not touching my face, and washing my hands.

Require masks when inside a business.

I am more interested in learning how the new school year is going to look like

Stop de-emphasizing wearing masks. I would not serve on a jury right now because the county does not enforce wearing a mask. Much of the public is losing the message that many infected people are relatively symptom free but are still carriers.

Businesses are doing a great job and they should be allowed to fully operate without any covid19 restrictions. Let the people decide how careful they want to be. We shouldn't be putting that on businesses.

I wish that businesses would all enforce mask wearing while inside...that way there will be no mask shaming for either wearing a mask or not wearing a mask.

The city seemed designed for young people without health conditions. So many still can't go out because lines to get in are too long, people aren't wearing masks, supplies still lot readily available so illness would cause more problems. This has caused so much depression

I appreciate that wearing masks is a choice for some businesses. I wish all like Costco would follow suit. Unfortunately, the virus of fear is a larger problem in our community, country and world. Thank you board for pushing our Governor. I hope someone holds him accountable to the law.

I don't really understand the State's Stage 2 instructions to businesses, so don't know what to expect from businesses even though Placer County has posted information on Nextdoor, but it seems vague and incomplete. While I'm sure I don't want to receive the complete instruction, there could be some "examples" of what to expect given.

---

I think that many of these practices go overboard for safety.

---

Masks should be mandatory for customers

---

Please open the libraries!

---

Let's get everything back to business as usual and take our own precautions like washing hands and staying home when sick. Protect the elderly but don't let them be alone.

---

Move to stage three asap. No masks required-only voluntary

---

We need to open. The only reason we closed was to prevent overloading medical services. We have not and are not likely to overload our system.. Time not to reopen everything. Businesses know their standards and are following them. Social media will be the control. let's move on now

---

I think our County doing well in a difficult time. Since Placer is a large geographically...larger than several Eastern states and since there are at three totally different areas in the county: Roseville/Rocklin/Lincoln, the foothills and the Sierra. It may be possible to allow some businesses to open differently in different parts of the county.

---

Everything is reopening too soon

---

Placer County is moving into Stage 2 too quickly at the expense of public health, evidenced by the recent spike in new Covid 19 cases. And the County is petitioning the Governor for a variance to move into Stage 3. Incomprehensible.

---

Let's realize... we are not sure and that is certainly a source of stress.

---

We left Auburn Home Depo and went to Lowe's, bought Refrigerator \$2300

---

The social damage from creating a wave of fear, steals the life that we presume to protect.

---

I hope every business is able to return to operating.

---

Move to stage 3 please

---

I hope all businesses are able to open.

---

Most people I know, and the company I work for are, not doing enough to prevent spread of the disease.

---

Stop this politically motivate charade. The numbers have not materialized from those grossly flawed models. End the lock down now and get everyone back to work

---

I happened to a few businesses. One in Loomis and the Boot Barn in Rocklin. They have signs posted about wearing masks but no one in the place is wearing a mask. I was especially upset at Boot Barn that had a nice sign actually had a mannequin with a mask on right when you walk in the door and not one person worker or customer was wearing a mask. I think they're putting up the signs because they're supposed to but no one is following the guidelines.

---

Everyone is doing a good job

---

Yes, we should have skipped stage 2 and moved to stage 4

---

People cross county lines all the time and I don't think anyone really understands what the requirements are

---

I feel businesses are taking this seriously and doing their best. I am a small business owner that has just opened to working with clients. Most customers are being very respectful with distancing.

---

The county needs to provide support to it's vulnerable residents who have no family or friends to help them get their meals, groceries, prescriptions. Some residents are living off of TV Dinners everyday because they can't even cook for themselves. Do not open up and leave your most vulnerable residents behind.

---

Let these business open. Quit supressing them. Now you need a survey about Law enforcement and racism in placer county.

---

I am uncomfortable with the push forward to stage 3. Stage 2 needs to fully play out, especially with the recent protests gathering large numbers of people without PPE in too close proximity to each other. We need public health and safety as the prime objective. Don't be hasty. We are not yet ready to plunge forward. The County Board of Supervisors is in too much of a rush.

---

Wearing off masks needs to be mandatory. I will not be shopping in stores that do not require masks.

---

As a nurse, I continue to SIP except for going to work, getting groceries, etc. I am disappointed to see the decrease in mask usage in the grocery store we usually use. Also, most of the employees are not wearing the masks correctly (nose is exposed). It's a joke. The increase in COVID19 cases in Placer County does concern me.

---

I do not think we are really prepared for many situations like dine-in restaurants. It is not just a matter of maintaining 6 feet of space, if you are in an area for an extended period of time with people not wearing masks (because they are eating) and no control over airflow, people are going to get sick.

---

It should not be up to the business. If anyone doesn't feel comfortable then they shouldn't visit or go out. Neither the county nor the state should be dictating what people can or cannot do.

---

My biggest concern is other people not maintaining social distancing and not wearing masks. I won't go back to any businesses until I feel I can safely social distance and others are wearing masks. I don't expect people comply. I am not happy with the Board of Supervisors, especially Weygandt making the statement that we have herd immunity. Weygandt just makes me feel he is not taking the dangers seriously so businesses and citizens will follow him, making me feel less safe

I want to stay in stage 2 for a while and see how the covid-19 infection rates go up, as expected and then decline again. So as to have ample health care availability before moving to stage 3.

Force businesses to make face masks mandatory for all employees AND customers. No shirt, no shoes, no mask, no service.

Wondering how many people will resume spending at their former rate? It's an eye opener how much money was saved during the closures. Maybe our massive consumption before the virus, will not continue? Does it need to for economic stability?

I have noticed that in grocery stores staff are not reminding people to give space to other customers due to customers becoming angry or they fear the customers will retaliate in some way.

Is anyone going around and checking? One store - all workers are masked and there is signs and tape on the floor. Next stop - no one is masking, or they are masking with their noses out! :( And no distancing! Who is helping the businesses do the right thing or is it a free for all?

The numbers, infected population, don't match the measures we have taken as a society to curb the spread of this particular infliction upon our community.

I think that some businesses are being totally irresponsible and I have chosen to never do business there again.

Make it a requirement to wear a mask when entering businesses. At least for now.

What is the county doing to enforce guidelines for reopening?

I am not in any hurry to run back out to shop. I will talk to a few business to get info prior to going to them.

The cure has become worse than the virus. We need to get our small businesses open or suffer a long term decline in our economic lives.

Glad all July 4th celebrations in the Basin, Truckee and Donner were all cancelled. We need to open cautiously

I think we just need to go directly to Phase 4!!!

Businesses are doing a much better job than customers at distancing/masks.

I don't think businesses should be responsible or held accountable for keeping people safe as it is not possible. Why are we setting this type of expectation level. Masks your joking. Wash your hands and don't touch your face. Go breath fresh air and enjoy life. If you don't feel comfortable don't stay home.

I listened to the last few Board meetings. Why is the County rushing to open when the majority of people (as illustrated in these polls and public comment) are more concerned with safety than re-opening businesses? A loud minority of residents (and Board members - UHLER) seem to be bullying the rest of the County into an idiotic and dangerous course of action. SLOW DOWN. People are dying. This is going to be difficult for a long time, but don't make it more difficult by rushing into this.

I wish the businesses could open without all the restrictions. The data for our county does not support the measures being taken. I tired of the charades.

I would prefer that the county required all residents to wear masks when in public. Social distancing is not being enforced and not happening. It's caused me to return to online shopping most of the time. I recently drove to Davis to grocery shop because Yolo County requires masks.

I am very concerned about lack of mask wearing and correct social distancing among young people.

Businesses should be able to open and let consumers decide if they want to patronize or stay home.

Why isn't it mandatory for masks to be worn by all employees and customers and social distancing enforced by all businesses that have customer service?

I do not see the majority of people around me complying with even basic rules. It is as though people in general feel that they are "above" the disease and not responsible for the general welfare of our diverse populations and people at risk.

Open more businesses. Move through the stages faster or skip them entirely and put everything back to the old normal. Placer County has less than 10 people in the hospitals, we can handle so much more before we need to be concerned. The virus will run its course and I do not want to wait for a vaccine that I will refuse to get.

Just open Placer County back up and let people make their own decisions.

i support moving lodging for tourism into stage 3

Let's move to phase 3!

Where does one find out what Stage is all about in Placer County and Roseville, it's not in the SacBee?

This is ruining the economy and it's time to open back up completely. It's ridiculous at this point to expect this to continue.

Given the surge in numbers in Placer County, I feel like it was too early to go to Stage 2, and I think that there is far too little oversight in making sure that business are in fact abiding by the Stage 2 requirements.

I prefer going to businesses that are back to normal.

Protesters SHOULD wear masks!

I don't think many individuals in the county are being careful. That defeats the efforts of businesses that are making an effort

Businesses in general need to enforce employee and patron face mask wearing better like Costco.

Thank you for doing a good job of opening our County and keeping us informed. Tracey Reliford

Businesses are no longer following orders and I do not feel safe going out. They should be fined for not following the cdc guidelines and/or shut down until they can.

People and businesses are acting responsibly. We are ready for the next stage

Restrictions are ridiculous. Take personal responsibility. If I don't feel safe I will not go to a business.

There is a wide range of peoples' views of the danger. It is best to be safe instead of sorry. It would be nice to see more consistent application of the guidelines.

I would like to see all cashiers in stores wear masks and would like businesses to require shoppers to wear masks.

Masks should be required in stores and enforced. There is no excuse for people not wearing them period.

Cautious but not afraid to get out. But will avoid groups.

There needs to be consequences for people who do not make it safe for others.

Within Placer County, the number of visitors and lack of mandated public face masks make me feel unsafe.

Go slow. Keep us safe. Its not about a populsr vote. Its all about doing what is known to be safe and effective

For the most part I feel that most businesses are doing a good job but I still see some employees without PPE. Mostly I am frustrated by the other customers who either don't or respect social distancing measures or wear PPE. Some businesses require customers to wear a mask and others don't enforce it, so it is sending a mixed message.

Placer county has large percentage of maga morons and our county is going to get a nice big second wave feel sorry for medical providers

I feel that the restrictions on businesses are still very severe and many customers are ignoring them because they do not feel they will contract the virus. But businesses at minimum should enforce the use of facemasks and social distancing when customers are on their premise to prevent further spreading of COVID-19

Need health restrictions of No shoes, no shirt, no mask, no service! If we can stop smoking in public places, we should be able to stop the spread of viruses with health restrictions.

Caution is needed still. This is Still a dangerous virus and even with so called lower numbers although the number of cases remains high, Sony community or state that has reopened too soon or without excellent cautions are surging in disease and outbreak and illness.

It's so confusing. Why can't all businesses open and make the right choices for their customers and employees. This has been going on for too long we need to figure out how to safely interact as a community again

It's time to open back up schools and business. The data doesn't warrant what is happening with some measures. At some point Government needs to rely on the populace and business to know what to do to be smart about our cleanliness and making sure we are being smartly safe with clients and customers.

I'm limiting my exposure. I'll let others be the Alpha and Beta testers!!!

I would like to see businesses back to normal. I understand they have rules they must follow, but I'm not very concerned.

I really feel like most businesses are doing their best to make customers feel safe.

The county should do a better job of helping residents understand that wearing a mask doesn't protect the wearer, it protects everyone else FROM the wearer, we all need to do our part to keep our most vulnerable safe and healthy.

Open them ALL and open libraries and the DMV in Rocklin please! No special protocols needed!

It's the "Wild West" out there. People are just doing as they please with no regard for consequences.

When can we go to stage 3?

The rules and expectations are confusing. Even with signs posted to wear a mask, not everyone does it.

Just get through quickly to stage 3 and beyond!

encourage use of mask, have available hand sanitizer. I don't agree on frequent spraying disinfectant on surface areas, if people think their hands are dirty, they can wash or sanitize it, then this surface will remain less infected. Continue open the business, parks, and mall.

They all seem very conscience, let's move to stage 3

I recommend Placer County announce the actual data. Real numbers, differentiate between death by covid or with covid, comorbidities, etc. Total number of people tested, total positive & negative, and whether tests even detect actual COVID-19 strain, or only generic corona virus. Full disclosure. Complete transparency. Data, facts, truth, AND reality. The whole big picture. I love Placer County and hope to retire here after 33 years with my employer.

Open hotels and STRs etc asap

It should be like "no shoes, no shirt, no mask, no service" for all until a reliable vaccine has been made

Stop enforcing others to wear face masks, they are for placebo effect only.

There are too many people in Auburn not wearing masks. I went into the cake and bread maker. They had great signage and 6 foot social distancing tape but none of the workers wore masks so I didn't want to go back.

Please don't jump into phase 3 so soon. Still having cases.

All businesses should be able to open without restrictions for them or their customers.

I wish we had guidelines for our business. We have done everything we believe to be safe and still can't open

**MASKS!** It would be great if masks were required EVERYWHERE and by EVERYONE. As Dr Sisson has said, my mask protects you and yours protects me. As someone who is currently high risk, I am wearing a mask, but if others are not, it is doing me no good. Because of this, I am not planning to patronize businesses unless they have mask requirements

Masks are not always worn covering the nose.

I have a bit of a problem with some businesses that aren't able to open using safe practices, like wearing masks, while lots of others like construction have had free reign.

I feel like we haven't really adhered to phase II and are not ready for phase III yet. People are acting like quarantine is just over rather than being cautious. We need a good testing program to make all of this work effectively.

Placer county citizen and business are doing a great job to fight COVID.

As more and more people stop wearing masks while in public the less inclined I am to participate in the "reopening" of Placer County. Coronavirus is still here and infecting people, and my concern is that Placer County's infection and death numbers are going to start going up because folks are getting too lax and there doesn't seem to be enough messaging from the county that we aren't out of the COVID-19 woods yet.

Open up further and let businesses recover.

Business should be required to mandate that all persons wear masks upon entering the premises, both customers and employees.

We just have to monitor the heck out of this and be ready if it explodes again because this has become ridiculously political and now ignoring guidance is a political statement. If those folks are right, awesome. How can I be upset? I pray they are.

You have done a great job of education. However, I recently visited some businesses and they were not following Stage 2 protocols. Certainly impossible to enforce. Do you have plans to reward businesses who are doing the right thing? Continue to educate those who do not?

Masks should be required to be worn by everyone when in situations where social distancing can not be assured. If people don't like it THEY can be the ones to stay home. Without requiring masks people with underlying health conditions are being discriminated against.

I see many businesses not following and guidelines. It seems like this really isn't being enforced

It seems like there are a lot of conflicting messages out there. It would be so much better if our county and state were on the same page. I have seen some businesses trying and some not trying to use guidelines. Same with mask vs no mask. Pretty random.

I'm very old and vulnerable - consequently I'm very careful and particular. What irritates me is to go to a store that requires the use of a face mask to enter - and then finding that almost no one inside the store is wearing one. And no one is social distancing. Walmart has been the worst offender of this.

I appreciate everything everyone is doing. I know it is the unknown and everyone is doing the best they can. I just want to hug my Mom who is a Senior Center! Thank you.

I feel like most businesses are being very responsible upon reopening, but I am not sure the strict guidelines are absolutely necessary. I'm happy to comply, but I think extra care with hygiene and limiting crowds is good enough.

People are to complacent

I'm not ready to be in closed and crowded environments but I'm excited to go to bring kids to public parks in open air.

OPEN THE CITY ! PEOPLE ARE LOSING EVERYTHING.

Have businesses post what their occupancy policy is supposed to be.

Wearing a mask in this county has become a political statement, way more than a health statement. That's horrible for all. Covid is not red or blue. We will see, and already are seeing, more cases as a result. The county needs to pump the brakes on opening further as there are examples of non-compliance of Stage 2 everywhere.

Time to reopen all businesses. The cure has been worse than the disease!

I am bothered by how unconcerned Placer residents are about the possibility we could see a resurgence of Covid and a much higher rate. I will not shop where others do not wear a mask.

I appreciate that there are many opinions on the stage 2 guidelines, especially as it relates to masks. However I do not understand the push-back for masks. Yes, they are warm and can be uncomfortable. Most people wear helmets on bicycles and motorcycles and use seatbelts in cars, yet some of those same people object to a mask as a symbol for how government is controlling and oppressive. I would like to see business reopen and the economy and employment begin to recover - if this means we wear masks then ok let's do it. I know some who say they cannot wear masks for medical reasons - let that be the exception. A lot of businesses and customers are doing a great job & do their part to keep themselves and others just a little bit safer. But in other instances there are still many patrons and even some employees in certain businesses who are not distancing and are mask-less. If we want to fully reopen we ALL have to make some concessions to be safer and slow the spread.

None of this will matter unless it's enforced, this includes restaurants being inspected to make sure they are limiting and spacing tables, places that are opening that should not be during this stage need to be cited for doing so, etc. Without it this plan has no teeth.

I am very scared by the deniers, and there are a lot of them around here. They can deny all they want except in vital businesses, like grocers and drug stores.

How soon can I get my glasses adjusted and have my hearing aids cleaned and adjusted? Politicians making these restrictions are definitely NOT in touch with the real world for their constituents. I will not vote for them next time. Which explains their reluctance to clean up our voting records system

Shouldn't we be shifting towards Phase 3 rather than focus on Phase 2? Placer County has proven we are ready to move out of Phase 2 even if that means we're stepping on someone's power hungry toes!

This is all ridiculous. This seems to be a Bill Gates fear mongering, deaths reported as covid19 even when deaths were non related. This appears to be the biggest scandal we've had since 9/11. The American people do not need a nanny state.

If business are required to do protocols about covid19, then the rest of the society should also be

communications are key. I check facebook and webpages before going to a business. Mainly I've been going to take out restaurants or more recently patio places. I appreciate all the efforts and communications is key. Examples include "The least busy time is 11:00 - 1 or 2-4." this helps me plan my visit. There are a couple businesses I've gone into in where no one was wearing a face mask and I decided to leave and not buy anything (coffee shop).

We had a need for repairs in our home. The company had an extensive detailed Covid 19 response action plan which they communicated well. However their employees for the most part ignored it completely.

Phase 2 opened quickly into full Phase 2 which was too fast. The latest increases in Covid19 cases were predicted. Please do not rush to Phase 3 until there's greater compliance with customers wearing masks and keeping physical distance.

Thank you Placer Co. for working with business and restaurants, allowing them to open dining in parking lots, extended signage, etc. We get you have to work within the parameters of the State. Thank you being as flexible as you can under these circumstances.

none

The rules need to be enforced through ticketing and other measures or they will fail.

Masks latex, gloves, and sanitation

Regular updates from Aimee Sisson.

Just that we want to remain safe/healthy but we are so ready to be moving toward normal!

Even if some people do not consider this virus a problem, there should be some trigger or compliance requirements for safe distancing and courtesy of wearing some sort of face mask around other people in public spaces. We can always choose to avoid the places where that isn't taking place, but the few people who are purposely and obnoxiously trying to be defiant in these safety precautions are pushing the socially acceptable limits. Do we want a police state?? No, but we do appreciate businesses and public places where safety practices are enforced.

Masks both ways!

I think it's confusing about individuals gathering - can we in small groups (less than 10). It's probably more personal comfort-but I feel like messages are conflicting.

Leaving options open for people to visit businesses is the best.

Make your employees come back to work so we can get people off unemployment. Keep your place clean. Be nice to all customers masks or no mask

I support opening all businesses with safety measures in place.

Let's end stage 2 now.

I look forward to innovations that provide more space between customers, more outdoor space, more fresh air circulation, less crowds.

Most businesses are complying, but not all of the customers are. The staff cannot tell a customer that they must wear a mask and abide by the rules, they are pretty much helpless, and I feel for them. Staff in retail establishments has to stay and put up with this all day, I can buy what I need and leave.

Just hurry up and open the businesses before they go out of business this is ridiculous all because of a Chinese virus that the media has blown out of proportion

Clear, uniform expectations, clearly posted. Are masks required or aren't they now??? Communicate that clearly to the public. The public is getting lazy and sloppy in terms of PPE. That's THE biggest complaint I have now. Consumers are making their own decisions, rather than stores ENFORCING some uniform standard.

Thanks to Placer Land Trust for keeping their open space preserves open to the public. It maintain outdoor outlets for maintaining sanity and good health

As long as people wear Masks and Clean Surfaces, I see very little risk in Placer County.

I feel the coronavirus is no worse than any other virus we have faced in this country before. I think now it is being used to political advantage of the Democrats . I would have no problem visiting any business excluding going to sports arenas theaters gymnasiums etc. I think the damage caused by the reaction to this virus is much worse than if we did not close our doors whatsoever . Please for the sake of our society re-open everything is 100% immediately . I am not a denier with the virus exists but simply says it is A common condition is the world deals with every year. People get sick people die but we cannot stop living. We may never have a Vaccine so am I to assume we are going to keep our society closed indefinitely. I'm willing to bet if Biden wins the election if this will just go away .

I have no problem wearing mask. Will continue to do so. I don't know who the people are you come in contact with. I would even wear gloves but just wipe up when I get in my car.

I believe physical distancing with wearing a mask correctly is the most important thing at this time. I have seen many with the masks not covering their noses which does not protect the other citizens around them. To make a point, I strongly believe the County Supervisors wear a mask in the public and at the meeting to show their leadership. Supervisor Uhler has been one with the most attitude of ignoring the science of COVID19. We are not ready to open up.

Target Roseville Fairway has made no adjustments and is totally unsafe. Same for Winco RV. Restaurant workers are in jeopardy. By the looks of it, in Rocklin/Roseville, people look like/ behave like Covid is done...and it's not. I suspect the positive cases will continue to rise, disproportionate to the number of negative tests. Placer used to be doing a great job and I felt safe. I believe we opened too soon, based on economics, not science, and we are starting to see the repercussions of that. Thank you!!

This whole lockdown thing is completely ridiculous with all the protesting, rioting and looting being allowed but legit businesses, barely hanging on, are still punished. Y'all have zero credibility.

I won't feel comfortable until everything is opened up ASAP.

Masks should be enforced in stores. Husband went to Machados orchards in Auburn and no one, not even the clerk's were wearing masks. It's upsetting. People think it can't happen to them.

I'll stay away from going into stores to the extent that I can.

Auburn is doing a better job than Roseville and the Togo's / Baskin-Robbins near Costco is awful. I will never go there again they had no masks and dirty tables :-)

I think the rush to reopen has been politicized. I'm angry that 3 of the county supervisors refuse to wear masks during their meetings.

Nugget market is the only place I feel safe. Every other place I've gone is not enforcing distancing or masks. People in Roseville are acting like Covid is over. It's a disaster.

I feel we still need to be very careful when out in public. As much as we can...wear masks, social distant, limiting the number of people in business, etc.

I would appreciate updates from the city on new cases every so often. I would like to know where outbreaks are occurring (stores? Family gatherings? Churches?) so I can plan what I do and don't do. I would also like updates about hospital capacity (cases are on the rise but we have plenty of beds and equipment, etc), because many people still seem to think it's over, or they don't need to wear masks.

I would like to see the implementation of motivational consequences (fines, misdemeanor charges, etc) for those businesses or individuals who endanger others by not following CA guidelines. Many live by the standard that if they can selfishly get

away with something it must be OK. This trend will only get worse if it is not demonstrated that it is not OK to place others in danger. Reckless drivers who endanger others are subject to penalties. Persons who selfishly endanger others should be subject to substantial penalties. If few pay attention to or follow the guidelines... why have the guidelines? "Hope" is not an effective strategy to combat COVID and all of its ramifications.

I think Placer is rushing into reopening and is making a mistake. We've already seen a spike. I do not think we should move to stage 3.

We need to open everything up! More people are dying from suicide and the economy is dying from the shut down! The "cure" is worse than the disease! Keep the sick and immunocompromised at home and let the healthy get back to work!

OPEN the world up!!!

Unfortunately, I have seen many employees not using masks or face shields properly, making them basically ineffective.

Open them all up!! If you can protest then your local businesses should be open

I am worried to go to the next because of the increase of cases

I wish information was more clear and there was a comprehensive list of what businesses can open. I have chronic Back issues and need chiropractic and massage therapy care which is still unclear. Where do we find all the info on an updated basis?

Employee's need to show compliance the very least when they are in front of customers, if they need to take a a break with the mask please do so away from customers. Seeing masks under chins or with noses out is frustrating when I'm wearing a mask. I'm keeping note of what businesses are doing a good job, and will continue to visit those establishments.

Seems all businesses I have visited are doing their best to inform and practicing social distance guidelines.

The businesses are doing what they need to do

All of them should make masks and social distancing necessary and face fines if they don't follow. It's working in so many countries abroad. Why not here?

The mask thing is hard but we need to get used to it. Even a vaccine will not take away the threat. We need to be prepared so we know how to shut it down when needed and re-open when safe as QUICKLY as possible. It's like Rolling blackouts and masks are our generators(power).

As more is learned about the virus, some of the rules should be changed or eliminated.

Open food preparation businesses make me very nervous. Like Chipotle and sandwich shops. If someone goes in the store without a mask, coughs and droplets get on the food, and are served to me later, that's very risky.

Customers and employees need to be wearing masks. I drove through the Green Acres parking lot and left due to the number of people there. I have changed from a grocery store that "recommends" masks for customers to one that requires them. People are not taking COVID-19 seriously enough -- see the recent spike in positive tests in Placer County.

So many people are not wearing face masks correctly, both workers and customers; only covering mouth but not nose, pulling mask down to speak, mask on neck instead of face. Most people no longer try to keep 6ft distance anymore.

Open faster. Let individuals make the right decisions for their personal situation.

I appreciate businesses that request or require employees AND customers to wear face masks

Like Costco, require all patrons wear masks; prohibit any patron or employee from entering the business without a mask.

Grocery produce workers need to wear masks!

I think that, in general, people in Placer County are not taking this as seriously as they should.

Customer should wear masks

Many people are not properly informed about the Safety protocols, or the risks to themselves and others if not adhering to them.

Please open up more.

Workers at Tahoe City Save Mart not all wearing masks. One, in particular, just wears her mask hanging off one ear. Another couple of them: no masks at all.

compliance in Placer County is pretty weak.

Let's open. Walmart and Home Depot have been open all this time

Many retail business that should be opened have not been given the OK to open, Examples are trophie & sign companies, printers, insurance companies, travel companies seem not to be open.

taking too long.

I feel like the statement is inconsistent. Some business have mandated masks while others encourage it. It takes a consistent message to help stop the spread.

I hate the employees wearing masks and gloves. The gloves are preventing them from washing their hands and just spreading more germs. I miss seeing people's smiles when ordering and talking.

I think Placer County is doing a great job. There is no judgment placed on me by business owners because I don't wear a mask. I appreciate the businesses who give their employees choices about wearing masks and not wearing masks, everyone should have a choice.

All customers should be required to wear face masks for the safety of employees and other customers.

There seems to be a huge difference between how different businesses are handling this, especially restaurants. I don't go back to those where I see poor standards. The ones that do a great job are very noticeable and are getting all my business.

There is still much confusion about what business are required to do. The messages from the county are very ambiguous.

Need to know which businesses are open and what they are doing to insure safety for me as a customer. Need to have more publicity on stressing the importance of safety measures to everyone. Some still think it's a hoax. Citations should be issued to business violators. Need to see Supervisors taking a more personal interest and letting the public know they are serious about keeping our County safe and healthy. Citizens are asking for more details on incidents of Covid 19, i.e., especially they want to know locations and "how" Covid 19 was contacted. Some newspapers and tv give details, but not everyone reads the newspaper or watches the particular tv station that provided more details/descriptions. (I understand the nature of HIPPA laws and personal privacy. The Non-believers, however, think recent increased testing just upped the numbers, i.e., the 33% increase. Please inform. I believe that this health crisis is serious and those I know are doing all required. Thank you

Here in Placer County a large majority of people think they have this virus beaten and so really do not care about protecting me and those around me. I have no underlying problem but I do not know if the person next to me does or has a family member at home that does so let's be considerate.

Keep the lines of communication open as a reminder of social distancing and wearing a mask.

Why don't the rules apply to protesters. I care more about the economy than the right to protest

Lift all restrictions, let's go.

I appreciate the posting of requirements at businesses since they vary due to each location's needs. Prefer when most customers have masks. Won't shop if it feels too crowded even with 6' and masks.

I personally believe mask should be required just not "Please wear a mask" sign. And business owners should be protected if they require this. For any business that states "No masks required", I will not patronage them. Interesting how the numbers are starting to rise since we moved in stage 2 of hair salons and restaurants opening. I'm also getting sick and tired of other customers giving me a hard time because I wear a mask. I do not say anything to them and so expect them not to harass or make comments to me.

I feel that it is premature.

Masks need to be mandatory for all businesses. Then I'd feel fully confident in going to them

I'm waiting and watching for the number of cases to decrease during stage 2

Would be helpful if all stores had signage regards how they are protecting their staff and the public out in front or in window. Rather like a mission statement that they can be upheld to if needed. I would feel like they were trying to comply with new standards for covid19.

Reopen everything and request people use caution and use gloves and masks if they want to.

Please skip all the stages and reopen everything back to the old normal. None of this is worthwhile in Placer County.

You pushed the governor to reopen. You spent thousands of taxpayers' dollars to pay for tests that are only 50% accurate. I won't be voting for any of you again.

I think making & gloves are a personal choice and that people who are sick need to be able to stay home.

Open without restrictions.

Requiring a business do comply with COVID rules only works if someone will enforce them. And I understand that is challenging and expensive, however you need to use some businesses as examples. For example, the Target on Douglas had multiple employees with no masks or the masks that were pulled down and not functioning properly. I am confident we will see spikes in COVID cases and we will have no other choice but to close everything down again. Thanks for the survey and reaching out to the residents.

With the recent significant spike in new Covid cases the past week it is clear that the county has chosen to open too soon. We must go back to tighter controls to insure that those of us at risk will not have the increased risk created by opening too soon. We must avoid the needless loss of more lives.

want the political pandering to STOP from the BOS. Its stupid

Employees have been good in most places managing their risk, customers are much less inclined to following the recommendations and there are no immediate consequences

Would like the political pandering to stop with the BOS. Would like them to acknowledge respectfully the work of HHS

Local businesses truly seem to be making great efforts to keep employees and customers safe. What I've noticed is some inconsiderate customers ignoring those safeguards. (especially young customers who seem to be more focused on their cell phones than on what they are doing, or where they are going.)

The observation of wearing face masks by business employees is hit and miss. Most customers I've seen in stores were not wearing face masks. Today I heard people having a discussion, saying that if there isn't a massive increase in covid-19 cases after all these demonstrations, they aren't going to bother with any measures anymore because they will think it's all been a bunch of hype, and they already won't patronize a business that says they must wear facemasks.

Open everyone and send people back to work

Given that we've had the highest number, since we started tracking, of new cases reported on 6/4, are the business requirements consistent and enforceable? How safe are we if we are reporting higher new cases daily, on a regular basis?

ALL employees at businesses should BE REQUIRED to wear masks and that is not happening!!!!

I'm just waiting a while before doing anything but pickup.

Open up businesses!!!!!! this whole shutdown has been based on computer models that predicted over 2 million people would die and it has been totally debunked!!!!!!!!!!

Burdens are already too heavy for most businesses that are working hard to open their doors and employ our neighbors. Don't burden them further with over-reaching restrictions and expensive solutions for political reasons.

All employees & customers should be in masks! Hand sanitizer should be available. Remove masks only to eat at restaurants.

I don't think anyone should be wearing masks or gloves in businesses.

I want to continue to cautiously open businesses back up, but be mindful at the same time. We had a 33% spike in new cases last week. I think as long as leadership continues to monitor that data and use it to make the proper decisions, I am happy to continue down this path. However, if cases continue to spike and the county or city continues to push through the stages, I would be very upset because of all the sacrifices we have made to get to this point and then lose all the ground we gained.

We need to allow youth sports

Can't wait for stage 3!

I support the Stage 2 reopening, but I'm very concerned that people (business people and individuals) are frequently not wearing masks and not always social distancing.

See if you can use that big electronic sign along I-80 in Roseville & say: Welcome to Placer Co : For your health and ours- Please wear a mask & do social spacing

I would like for all businesses to operate Completely as normal, as before the Covid closures happened. I don't believe any precautions above normal are necessary. Everything should open and operate as if nothing happened.

Everyone in a business customer or employee should be required to wear a mask as in Yolo County.

Calm down the crazy.

I hear people say they aren't concerned they'll get sick, but not a word about the fact they could unknowingly give it to someone who could have horrible consequences and even death as a result of their selfishness. If we all wore masks we would come back at the absolute fastest possible pace. Don't wear them and we will learn the hard way. Pick one.

I don't feel the data for our county warrants all the restrictions to reopen.

Let's get businesses open and let people make their own choices.

Not all people is following the guidelines of using face covering. Even in some businesses the employees don't use them, which is disturbing when is a grocery store, I feel the employees don't feel with the authority to ask the clients for it, unless is a big business with membership.

It would be nice to have updates on the Placer County Library. On the website it looks like it was last updated on March 24. The City of Roseville is offering online holds and pick up service. Is that something in the works with the County?

I really wish the DMV would do a better job of telling everyone what their plans were.

Please open up the gyms quickly. I'm in depression without my gym!

The data doesn't really support some of these extreme measures, so I think businesses should be able to resume as normal.

More signage at business as to what is expected. I wish masks were required of customers in grocery stores.

They should not have to follow so many restrictions. I can't even try on clothes when I go shopping!

I'm rather unimpressed by the enforcement pertaining to eating establishments and bars in Placer County

I don't like the limitations put on the businesses they won't be able to stay afloat.

If they aren't, especially Walmart, all grocery stores should disinfect all shopping carts and carry-baskets. Signs should indicate that this is being done.

Time to end all stages and get back to business as usual.

Masks should be required in all businesses and in enclosed public spaces where one has to be in close proximity to others, like post office and grocery stores.

On the stage 3

The rules are simple, but yet so many people so easily forget.

Things are too lax. Things are going to get worse.

We still must do all that we can to stabilize this virus. Since reopening, more positive cases have appeared. Might be because of the testing, but could be that still a lot of people, I see, are out in public without masks or social distancing. We have got to be more careful!! I think that wearing masks and social distancing should be enforced more. Business ought to say...no masks...no entrance into business.

All businesses should require masks

It is about time we opened up again.

Masks and social distancing

I am immunocompromised so I am not going to be out and about.

Let the general public decide what is safe for their own given risk factors and reduce demands like masks. But encourage hours or opportunities for high risk people to shop with safeguards in place like all employees wear masks and clean high touch surfaces. Do not define high risk simply by age

Require all staff and customers to wear masks and distance

we need to move on to Stage 3 ASAP

NA

More aggressive enforcement

KBRA needs to have the beach monitored for social distancing, keeping people moving rather than bringing their paraphernalia and staying all day, and checking ID's to filter out non-residents.

After encouraging large scale protests and riots I assumed the government was no longer concerned with coronavirus.

This is a tough time. I was running errands in Auburn and you wouldn't even know there had been a pandemic. Everything was back to normal. I will limit my visits

Please stay consistent with quality check ups with businesses to maintain keeping up what is expected of them. More outdoor dining a must. Thank you.

I would love to see all businesses taking good precautions and enforcing mask rules for employees and customers so that we can keep businesses open without a reemergence of the virus in our community.

I understand the rules to be voluntary & am comfortable following them but it's alarming how many people find them as an attack to their freedom

Only 50% of customers, if that, are wearing face coverings. Everyone should be required to wear one. That should be put forth by the County and not put upon the individual businesses.

Masks are a violation of my human and civil rights.

Cosmetology services (nails, esthetician's, massage) should be allowed to open with appointments. They are all trained in proper sanitation and hygiene.

Many people seem to think the virus is over or don't care if they spread it to vulnerable groups. Really sad.

most doing good job

Thank you for letting them open! I'm a hairstylist and all of my clients are so thankful we are back and running!

Re open everything and move forward. Viruses will always be with us and we cannot hide forever at the expense of our businesses.

Allow business owners to make decisions about how they treat these guidelines. Allow patrons to decide whether or not to wear masks

NO

Open kids sports, schools Kids need to be active now

I wish there was signage to indicate if employees wear masks inside a business so I can tell before I enter.

Sick and tired of employees not wearing a mask. Want all visitors to a large box store like Target or Home Depot or supermarkets robe required to wear masks

Hope to see more businesses opening ASAP! Really concerned for them, especially Extreme Gymnastics

I think all businesses should be allowed to open now.

A lot of people I see are not taking masks and social distancing seriously.

Lots of businesses telling me that customers refuse to wear a mask and there's nothing they can or want to do about it.

Let's get to stage 3!

Open placer county! Let us play sports!!!!

It's super disappointing how few people are wearing masks and social distancing. The lack of awareness and acceptance that we are still in a health crisis is frightening.

I am truly surprised and appalled at how many people and businesses are not observing face mask recommendations and social distancing.

WinCo in Roseville is doing a horrible job...contacted headquarters and their response was inadequate...Will NOT shop there again until they become more responsible

Time to open everything!!

OPEN US UP - we are smart enough to take care of ourselves as we feel best - it is stupid, very random, a lot of hypocrisy and has a blatant appearance of politicism

Our county should have re-opened by the beginning of May when it was clear we had very very few cases.

Until we are in Stage 4--it's not business as usual and I and my family will still limit as much as possible going out in public.

I do not agree with allowing lots of people from other areas where the infection rate is significantly higher (like Sac and the Bay Area) than the infection rate is here to come here.

limit dirty bay area folk

get it over with and re-open. help people feel less scared. DO NOT REQUIRE FACE MASKS

The rules seem unfair. Protest large numbers ok. Church or graduation no. Open up everything be safe. If, I mean if it starts to go bad then shut down. We shut down quickly before. Trust your people!

At this point businesses need to open. People won't go if they feel unsafe and make sure businesses have safety protocols. The govt needs to back away now

I feel people have gotten really lazy about wearing masks and it's making it more uncomfortable for me to go out. Even places like Costco that mandate you wear one, once you get in people are pulling them down and none of the staff will say anything. I wish the country would mandate that you have to wear a mask in all public places, then it wouldn't be a problem or a question.

The County should business and verify compliance.

Take care now to speed up later.....

There is still a lot of fear out there, people need to be reminded that the risk level is relatively low, but still there.

Many restaurants can't survive under these guidelines..

I perceive that Placer County has given in to the conservatives in this county and are not enforcing all people where masks In this county, therefore we e seen a rise in Covid by 33% cases overnight! Not ok!

We need for wearing face masks be ENFORCED

Some restrictions are silly. Walking to a table masked and then unmasking. In my opinion.

Let's open up!

I am a health professional and feel that the government guidelines are extreme. So glad that the businesses are opening back up but sad for the ones that weren't able to open back up AND I MISS MY CHURCH!!!

Our mantra should be. If you are sick stay home!! If you are old or infirm be careful. Wash hands frequently. Eat healthy immune promoting foods. Then get on with it.

No

None.

Better monitoring of business compliance and mandatory masks not just suggested

Lets get this moving and our County/State back to work already! If you must implement guidelines then do so (within reason) but open ALL. Stop picking and choosing. No way Walmart is cleaner than over half of the establishments that are still mandated to be shut down! Also get our kids back to sports!

More businesses should make and enforce employees and customers wearing face masks.

Open every thing up!!

Given the riots, all this is for not. Let businesses open. Let them decide the best course of action. People will decide if they are safe or unsafe and will go to those that are safe.

Businesses need to open faster to save the economy.

I want the Nail Salons to open. I don't understand why bars are open but not Nail Salons. I never fell all over someone drunk off my butt at a Nail Salon! Plus they already had been using mask on a daily basis.

I think we have long passed the need for shelter in place and social distance. If someone feels better wearing a face mask and social distancing that's okay by me, but I don't believe I should be forced to wear a mask. When I am out and about I'm aware of others and give people their 'social distance' for their feeling of well being. I believe in 'herd immunity', but I do believe in protecting the most vulnerable(elderly and those with immunity issues). There were 80,000 people who died last year from complications to the flu even though there is a flu shot pushed onto the public every year. I am a 58 year old male who thankfully has had to work(still have income) through the whole shutdown and empathize with those who have been affected by the Covid-19 whether through illness of a loved one or losing a job because of the shutdown.

It appears that many people choose not to wear a mask when entering a business. Not sure what the store can really do about it.

A lot of people out in public have the attitude "no one can tell me what to do". This makes me feel less safe.

I feel too many businesses are still closed.

This fiasco is being over-regulated. People will return to business when THEY feel comfortable. Allow all business to re-open and allow them to mitigate and manage their own risks with guidance, not mandates. If people can go into Safeway then they can go into any small business clothing store or other establishment. The government should not be allowed to chose who can open.

I believe that grocery stores are a maor point of potential covid spread and that, after 3 months as an essential service they should all be prepared to protect both their staff and their customers by offering curbside pick-up, preferably ONLY curbside pick-up. Those that don't should be asked to close until they are prepared to do so.

Need everyone to be more informed.

I feel that everything should be reopened and people should be able to get back to work. The government should advise but not determine if a business should be allowed to open.

I don't go in where I see long lines of people waiting to get in . I understand it is an effort to monitor numbers and that is appreciated but hopefully for everyone's sake an alternate for standing out in heat can be identified. I know everyone is working out in a trial and error way, I just hope a good balance using common sense will prevail to balance what still is a risk and not having businesses go under financially trying to comply.

Open up Short term rentals

Don't own a business, have chosen NOT to visit newly opened businesses, will continue to limit trips to essentials (groceries, medical) until I feel safe, regardless of phase

6 months since patient 0 and only 180 cases in placer. we should have opened months ago. It is not a threat to healthy people.

It's time to help small businesses open back up.

Covid rate is 0.004. Stop with the mask and distancing nonsense. It is against CA OSHA !!

Open businesses. Open schools. Open pools. Start doing sports and events.

Lets get to phase 3
